Objective

As a BIM Engineer, creates, manages, and maintains digital 3D models of buildings and other structures. These models contain detailed information about the buildings design, construction, and performance, and are used throughout the buildings life cycle, from design and construction to operation and maintenance.

Experience

- Quba Group** Sep 2023 - Aug 2024
Site Engineer
 - Managed and supervised construction projects.
 - Coordinated with architects, contractors, and Structural Engineer To Solve Issue.
 - Conducted regular site inspections to monitor progress, safety, and compliance with regulations.
 - Prepared and maintained project documentation including drawings, reports, and schedules quantity.
- SACPL** Sep 2024 - Present
Jr BIM Engineer
 - Develop and manage BIM models for structural components using software such as Revit.
 - Collaborate with architects and other engineering disciplines to integrate structural designs into the overall BIM project model.
 - Ensure accuracy and completeness of structural models and associated documentation.
 - Perform Interference Checks and resolve issues related to structural elements.
 - Generate construction documents and support the creation of as-built documentation.
 - Collaborate with project teams to meet project deliverables and deadlines.
 - Stay updated on industry trends and advancements in BIM technology and methodologies.
 - Follow company/project BIM standards, templates, and best practices.
 - Create GFC extracts from Revit.

Education

- Savitribai Phule Pune University** 2023
BE CIVIL
8.65 SGPA
- S.H.A RAIS HIGH SCHOOL AND JR COLLEGE** 2017
HSC
55%
- S.H.A RAIS HIGH SCHOOL AND JR COLLEGE** 2015
SSC
77%

Skills

- AutoCAD (2D Planning, Elevation, Sectional Elevation & Detailing).
- Revit Architecture (Modelling, Designing, Detailing of 3D Models, Scheduling & Cost Estimation).
- Revit Structure (Structural Design, Rebar Design, Foundation Design, Steel Structure Detailing, Schedule And Quantity).
- ETABS (Structural Analysis).
- Escape 3D (Classic Rendering).
- Lumion (Realistic Rendering).
- AI Rendering.
- Well versed with MS Office and Internet Applications.

Strength

- Problem solving Ability.

- Time management.
- Decision making.
- Team work skills.
- Quick learner, Curious to learn new things.
- Ability to cope with failures and try to learn from them.

Projects

- **BUBBLE DECK SLAB**
 - i. The bubble deck is reduced the concrete volume so that the slab weight ultimately decreased.
 - ii. It is suitable where load carrying capacity of soil is less.
 - iii. Weight reduction is the important factor is found in the slab. Conventional slabs weight is 25% more than the bubble deck.

Achievements & Awards

- Football winner in school sports.
- Tug of War Winner In College.

Activities

- Participate in research paper composition 'Rain Water Harvesting'.
- Volunteer in Campus activities.
- Participate in Straw making and gaming competition.
- Industrial visit to "Manmad Railway station"
- Industrial visit to "Nashik Waste Management Private Limited"
- Industrial visit to "Hydropower Plant"-Igatpuri
