EDUCATION

BE CIVIL ENGINEER

Mohamed Sathak AJ
Engineering college (2017-2021)

EXPERIENCE

Total Experience: 2 Years

- InfinevoD - 2year 6 Months - Trichy, India
- L&T - 6 Months - Cheennai - India

ABOUT ME

Enthusiastic and self-motivated bim modeller with 3 years of experience, specializing in creating precise 3D models and sheets based on design drawings, from LOD 100 to LOD 500. My expertise lies in accurately translating architectural and engineering plans into detailed digital models, ensuring high-quality, error-free deliverables.

SOFTWARE

- Revit
- AutoCAD
- Navis
- Sketchup

LANGUAGES

- Tamil
- Malayalam
- English

PROJECTS HANDLED

• Wynn Resort- CAD to BIM (LOD -300)

Rash al khaima, Dubai

Roles and Responsibilities

- The Al Wynn Resort, located in Ras Al Khaimah, Dubai, is a prestigious project . My role primarily focuses on designing and creating custom furnitures in detail, and well as developing detailed interior design (ID) specifications to ensure the project's aesthetic and functional requirements are met.

• VARNASI INTERNATIONAL CRICKET STADIUM (LOD-100-300)

Up.India

Roles and Responsibilities

- As a key team member in the Varanasi cricket stadium project, my primary role. was to create schematic models and detail drawings in specific areas of the stadium,
- My responsibilities included creating detailed plans for seating arrangements. player facilities, and other key areas of the stadium, I utilized my expertise in architectural drafting and design software to produce accurate and precise drawings that met the project requirements.

**PROJECTS
HANDLED**

• **LE - MERIDIAN (LOD 300)**

Saudi Arabia

Roles and Responsibilities

- 1.The Le Meridien hotel in Saudi Arabia is undergoing an interior fitout makeover.
- 2.My responsibilities include making furniture families and arranging them in various rooms.This may include designing furniture pieces such as sofas, tables, chairs, and storage units.

• **FACEBOOK DATA CENTER (LOD - 400)**

Singapore

Roles and Responsibilities

- 1.This project involved working on the electrical services at a Facebook data center. My role in this project was primarily focused on creating sheet work and coordinating with the site team.
- 2.This included designing and planning the electrical layout, ensuring all necessary components were in place, and coordinating with the team to ensure the smooth implementation of the electrical services.

• **NFE GAS PROJECT - CAD to BIM (LOD 300)**

Qatar, Doha

Roles and Responsibilities

- 1.This MEP services project involved creating mechanical, electrical, and plumbing systems for several small buildings.
- 2.As a part of the project team, my role was to design these systems and ensure there were zero clashes between the different services.

• **SPENCER SCAN to BIM (LOD-300)**

United Kingdom

Roles and Responsibilities

- 1.This project involved the development of a LOD 300 model for a residential building, with a focus on the structural aspects of the design.
- 2.As the structural engineer on this project, my role was to develop the structural components of the model, ensuring that they were accurate and coordinated with other disciplines such as architecture and MEP,

**AREA OF
EXPERTISE**

- | | |
|--|---------------------------------|
| 1.Creating 3d model as per design (Arch,Str,Mep) | 4. Resolving Clashes |
| 2.Creating families with parameter | 5.Creating Sheet work for mode |
| 3. Landscaping modelling | 6.Shedules and quantity takings |
-
