📍 Mustaid pura Bidar, Karnatafia, India (P no: 585401)

SUMMARY

I am a detail-oriented and certified BIM Modeller with over a year of experience in 3D modeling, clash detection, and project coordination. My expertise includes working with Revit, Navisworks, and AutoCAD to deliver high-quality models. I excel in collaborative settings, ensuring design accuracy while adhering to BIM standards. I have strong skills in visualization and presentation, along with a commitment to professional growth in the BIM field

EXPERIENCE

BIM Modeller

The BIM Skills

📅 July-2024 - Present 📍 Bidar, Karnataka, India

The BIM Skill Training Institute and Consultants specializes in BIM training and consulting services

- Developed detailed 3D models using Revit for architectural, structural, and MEP disciplines
- Assisted in transitioning from 2D CAD to 3D BIM workflows
- Produced architectural models and coordinated with structural and MEP teams
- Created families and parametric components for Revit libraries
- Created COBie-compliant schedules using Revit and validated data with Excel tools
- Published models to Autodesk BIM 360 Docs for collaboration with design consultants
- Generated renderings and walkthroughs using Enscape and Lumion for client presentations
- Utilized DiRoots OneFilter to manage large model elements efficiently
- Conducted clash detection and coordinated resolution meetings using Navisworks
- Supported BIM Manager in creating and updating BIM Execution Plans (BEP)
- Delivered LOD 300-400 models for large-scale commercial and residential projects
- Collaborated with architects and site engineers to ensure design intent and constructability
- Exported and validated models in IFC format for consultant compatibility
- Developed basic Power BI reports to showcase schedule and cost estimations
- Participated in BIM coordination meetings and weekly model updates

EDUCATION

Bachelor of Engineering

Visvesvaraya Technological University

📅 Feb 2017 to oct 2020 📍 Belagavi, Karnataka, India

KEY ACHIEVEMENTS

0 Project Delivery and Collaboration

Successfully delivered LOD 300-400 models for large-scale commercial and residential projects, ensuring collaborative processes and adherence to BIM standards
