

VINOTH RAJA

BIM MODELLER (ELECTRICAL)

+91 80159 64129

vinothramya0409@gmail.com

kallakurichi,Tamilnadu

PROFESSIONAL SUMMARY

A detail-oriented professional with nearly two years of experience in BIM modeling and project coordination for large-scale commercial and residential buildings. Proficient in using Revit, Navisworks, and BIM 360 to prepare accurate 3D models, clash-free designs, and detailed shop drawings. Skilled in coordinating with multidisciplinary teams to meet project specifications and timelines. Recognized for optimizing workflows, reducing rework, and ensuring high-quality deliverables. Adept at adhering to international standards and delivering innovative, cost-efficient solutions.

EDUCATION

HINDUSTHAN COLLEGE OF ENGINEERING AND TECHNOLOGY,COIMBATORE.

2018-2022

BE. Electrical & Electronics Engineering

SKILL

- Revit MEP
- AutoCAD
- Navisworks
- BIM 360
- MS Office

PROFESSIONAL EXPERIENCE

Pinnacle Infotech Solutions, Madurai, India

AUG 2022 – PRESENT

Role: BIM Modeler

- Conducted preliminary checks of detailed and shop drawings to ensure quality and accuracy.
- Developed comprehensive detailed drawings and 3D models for electrical systems.
- Analyzed project specifications and ensured compliance with material submittals.

KEY PROJECTS

1. Aramco Stadium Development, Saudi Arabia

CURRENT PROJECT

A state-of-the-art stadium project in Saudi Arabia for large-scale sports events, requiring complex MEP system integration.

2. Multiplex Etobicoke Civic Centre, Canada

A civic center featuring multipurpose spaces, focusing on sustainable and innovative design.

3. Stroudley Walk, UK

A residential development in the UK requiring meticulous MEP coordination and quality assurance.

4. ISG Project, Germany

A modern commercial building adhering to IFC standards, featuring advanced electrical and fire systems.

5. **STT Mumbai DC4, Navi Mumbai**

A cutting-edge data center project demanding high precision and reliability for electrical systems.

6. **New Phnom Penh International Airport, Cambodia**

A world-class airport project designed to support regional connectivity and tourism growth.

7. **Shura Island (Red Sea Corporate), Saudi Arabia**

A luxury island resort featuring world-class hotels, golf courses, and entertainment facilities.

8. **Northstowe Campus Phase 2, UK**

A multi-floor educational campus project emphasizing efficient design and energy use.

9. **Unit 17, Mole Business Park, Uk**

A commercial building project designed to house modern business facilities.

10. **Lucent Corner, UK**

A high-rise mixed-use building featuring residential and commercial spaces.

RESPONSIBILITIES:

3D Electrical Modeling and Coordination:

- Develop detailed 3D models for electrical systems, including containment, lighting, power distribution, and ELV, ensuring seamless integration with MEP and structural services.

Shop Drawing Creation

- Generate accurate shop drawings for electrical layouts, panel schedules, and cable management, adhering to project-specific and industry standards.

Clash Detection and Resolution

- Perform clash detection using Navisworks and resolve conflicts related to electrical systems during coordination meetings.

Team Leadership and Coordination

- Guide and mentor team members in creating high-quality 3D electrical models and shop drawings while ensuring timely project delivery.

Standards and Specification Compliance

- Ensure all electrical designs align with project requirements, client standards, and relevant codes and regulations.

System Coordination

- Collaborate with MEP teams to coordinate electrical systems with mechanical, plumbing, and architectural elements for optimized designs

Constructability Reviews

- Analyze designs for constructability, addressing potential issues and providing solutions to minimize on-site challenges.

Quality Assurance

- Conduct detailed quality checks on electrical models and drawings to ensure accuracy and consistency.

Documentation and Reporting

- Prepare comprehensive reports, including zero-clash documentation, panel schedules, and as-built drawings, for submission and approval.
