

THEEBAN S

BIM MODELLER

With three years of hands-on experience in modeling, coordination, and shop drawing creation, I have established a robust expertise in efficiently routing services while leveraging advanced features and shortcuts in Revit, AutoCAD, and Navisworks. My proficiency lies in developing detailed models and drawings across diverse projects, optimizing pathways for mechanical and plumbing systems, and adhering to industry standards and best practices in BIM modeling.

WORK EXPERIENCE

- **Pinnacle Infotech Solutions, Madurai** **2022 - PRESENT**
Senior Engineer
- **Red Sea Global , Saudi Arabia** **(Onsite)**
BIM Coordinator & BIM Modeler

WORK PROFILE

- **BIM Project Management:** Effectively overseeing and executing multi-disciplinary BIM projects, ensuring seamless coordination among trades and adherence to project timelines and deliverables.
- **Stakeholder Collaboration:** Leading and facilitating weekly coordination meetings with project stakeholders, documenting and circulating minutes to maintain transparency and alignment.
- **Risk Management:** Conducting comprehensive project risk assessments and implementing strategic mitigation plans to ensure uninterrupted project progression.
- **Quality Assurance:** Establishing and maintaining robust quality control measures, conducting detailed reviews to ensure compliance with industry standards and client specifications.
- **Value Engineering:** Delivering cost-effective solutions while optimizing design functionality and maintaining project integrity.
- **Team Leadership and Performance Monitoring:** Managing BIM teams by providing technical guidance, conducting training sessions, and reviewing project performance to ensure consistency with established BIM standards and workflows.

PROJECT EXPERIENCE

• **Alemco (Natural History Museum & Centre of Curocity Building), Abu Dhabi**

In this project, I contributed as a BIM Modeler, focusing on HVAC and Chilled Water system modeling. I prepared detailed shop drawings to guide construction activities, coordinated with multiple trades to resolve clashes, and developed RFIs to address design and execution queries. This project required meticulous attention to detail and adherence to high-quality standards.

• **SHURA Island – Residential Building, Saudi Arabia**

As a BIM Modeler for this residential building project, I managed the modeling of HVAC, Chilled Water, and Water Supply systems. I created accurate shop drawings for implementation and ensured smooth coordination across trades, resolving clashes effectively. This project honed my skills in multi-disciplinary collaboration.

Address

Madurai, Tamil Nadu

EDUCATION

2016 - 2019

**Kongu Polytechnic College.
Erode**

- Mechanical Engineering

2019 - 2022

**Dr. Mahalingam College Of
Engineering & Technology.
Pollachi, Coimbatore.**

- B.E Mechanical Engineering

SKILLS

- Revit MEP
- AutoCAD
- Navisworks
- MS Office
- BIM360

• **AIMS Medical Science Hospital (L&T), India**

For this hospital project, I was responsible for HVAC and Chilled Water system modeling and the creation of precise shop drawings. I played a key role in clash detection and resolution, ensuring all trades were well-coordinated and project timelines were adhered to. This project enhanced my expertise in delivering healthcare-specific BIM solutions.

• **SHUSHAH Island Saudi Arabia**

On this island development project, I handled the modeling of HVAC, Chilled Water, and Water Supply systems. I worked collaboratively with other trades to identify and resolve clashes, delivering accurate and reliable models. This project showcased my ability to manage complex infrastructure requirements.

• **Turtle Bay Staff Village – Plant Room, Saudi Arabia**

As the Project Manager for this initiative, I ensured stringent quality checks and adherence to standards. I conducted weekly client meetings to provide updates and address concerns. Additionally, I generated clash reports using Navisworks and facilitated the creation of clash-free models, ensuring the project's success.

• **Dammam Aramco Stadium, Saudi Arabia**

For this prestigious stadium project, I undertook HVAC and Chilled Water system modeling. I collaborated with other trades to resolve clashes, updated models based on client feedback, and prepared RFIs for design clarifications. My responsibilities included conducting quality assurance and creating clash-free models to meet the client's expectations.

• **Microsoft YT040, Canada**

In this project, I worked as a BIM Modeler, focusing on HVAC and Chilled Water system modeling. My responsibilities included coordinating with various trades to resolve clashes, generating clash reports using Navisworks, and creating clash-free models to ensure smooth project execution. I also conducted quality checks and assurance to meet the highest standards and ensure the reliability of the deliverables.

• **Dubai Airport As-Built (DAE) , Dubai**

As a BIM Modeler for this as-built project, I was responsible for HVAC and Chilled Water system modeling. I collaborated with other trades to resolve clashes and generated detailed clash reports using Navisworks, ensuring the delivery of accurate, clash-free models. Quality checks and assurance were integral to this project, ensuring compliance with the stringent requirements of an airport environment.

LANGUAGES KNOWN:

- English
