

Summary:

Detail-oriented and innovative BIM Structural Engineer with 2.5 years of experience in structural Modelling Proficient in using BIM software to create accurate 3D models, coordinate with multidisciplinary teams, and ensure project compliance. Strong problem-solving skills and a commitment to delivering high-quality work on time and within budget.

Educational Profile:

- B.Tech in Civil Engineering from Dronacharya Group of Institutions, Greater Noida Uttar Pradesh(2019-2022)
- Diploma in Civil Engineering, G.B pant Institute of Technology, New Delhi in 2019
- 10th from Deepalaya School, New Delhi in 2016

Software Skills:

- Autodesk Revit
- Autodesk AutoCAD
- BIM 360 Docs & Design / ACC
- Google Sheets, docs & forms
- GeoSLAM Software
- Global Mapper 3D
- Bentley Context Capture
- Naviswork Manage

Core Competencies:

- Contour Mapping, DEM file , Aero triangulation as well as 3D Mesh Reality data in Global Mapper 3D & Bentley Context Capture.
- 3D Modelling in Revit Structure/ Drafting on CAD.
- Clash Detection and construction simulations.
- 3D LiDAR Scanning and Collecting Point Cloud Data.
- Analyze the point Cloud Data in GeoSLAM Software.

Work Experience:

THE BIM Engineers, Gurugram (October 2023 - Present)

BIM Engineer (Structure)

Deputed at Jacobs, Gurugram – Tata Electronics (November 2024 - Present)

This Project includes several key components building, like FAB, Admin, CUP, WWT etc. here, I am working in the FAB Phase 1 (semiconductor) Chipset Plant in India. Where the project is in starting phase, and I am working modelling as well Sheet production upto LOD 300. Here I have to create Annotation Family, Detail book Drawing, Co-ordination with the discipline & Client. Working with the engineer & amend in the Revit Model, Generating Schedule. As well as clash detection in Naviswork & resolve the clash with other discipline. Create RFI ticket.

Shebara Island – Helipad (September 2024 – October 2024)

This project includes several key components, such as the creation of an earth pit for electrical grounding, ensuring safety standards are met. A well-planned foundation layout is essential for supporting the helipad structure, while flame traps are incorporated to mitigate potential fire hazards around fuel storage areas.

The design also features pull pits that facilitate drainage and maintenance access, along with manholes to allow for easy access to underground utilities. To enhance operational safety, remote sensing technologies will be implemented to monitor environmental conditions. The project encompasses the layout of a robust concrete slab, taking into account the island's unique topography to optimize placement and drainage. Surrounding pavement will be designed to provide efficient vehicle access, further enhancing the helipads functionality.

Deputed at Bechtel, Gurgaon office. (November 2023 – August 2024)

Working on Intel Data Centre project for Structure Design Development and sheet production on Revit up to LOD 350 & 400. Worked on LOD 350 & 400 in steel & concrete modelling with the help of NWC file. Prepare RCC & steel structure drawing on Revit under supervision of Senior engineer. Coordination with MEP for any changes & clash regarding support. 3D models using steel & RCC structural elements like-Hollow steel sections, Concrete Column, Beam, Trusses & provided steel connection to the structural elements. Staircase & Ramp Sections, Layout & plan.

SIPL Pvt. Ltd. (Oct 2022 - Sep 2023)

BIM Application Engineer (Placed in Okhla, New Delhi)

- 3D LiDAR Scanning.
- Post processing the Point Cloud Data in Geoslam Software.
- Geo referencing and Merging the Point Cloud Data.
- Classification of Point Cloud Data (Ground, High/Medium/Low Vegetation)
- Colorized the Point Cloud Data.
- Measuring The Area and Perimeter.
- 3D modeling and design development of Structure element in Cad/ Revit.

Go-Alubuild Pvt. Ltd. (July 2022 - September 2022)

Graduate Application Engineer (Technical) (Placed in Noida)

- I have done work in the DPR, Quality Engineer, as well as Glazing In charge in the site.
- They Have several projects in Delhi-NCR, I have placed in the DLF Tech Park Site.
- I have also worked on AutoCAD for the Facade work.

Black Olive Ventures Pvt. Ltd. (Feb 2022 - July 2022)

Valuation Analyst (Placed in Noida Sector 62)

- Estimating the cost of the Residential and Commercial Buildings Like Builder Flat, Developer Flat, Warehouse, Factory etc.
- Prepare a Report as per the Deed and the Bank Documents.

Larson & Toubro Pvt. Ltd. (June 2019 - July 2019)

Internship (Placed in Mayur Vihar Phase - III)

- Training Programme in PWD, GNCT of Delhi, in the Project of Barapullah Phase- III Elevated Corridor.
- I learned during my training about the Bridge Segments and Types of Bridge.
