PROFILE SUMMARY:

- ❖ Detail-oriented and passionate BIM Modeler with over 3 years of experience delivering high-precision Structural models across commercial and infrastructure projects. Skilled in applying industry-standard BIM practices and tools to support design optimization, construction efficiency, and facility management. Adept at working with LOD 300–500 models, coordinating multidisciplinary teams, and driving project success through accurate modeling, data management, and effective communication.

WORK EXPERIENCE:

- ✓ Pinnacle Infotech Solution – Tamil Nadu, India
 - ▲ Senior Engineer (Mar2024 – Present)
 - ▲ Executive engineer (Aug2023 – Mar2024)
 - ▲ Trainee Engineer (Aug2022 – Aug2023)

WORK PROFILE:

- ✓ Manage and execute multidisciplinary BIM projects, ensuring coordination across architectural, structural, and MEP trades.
- ✓ Lead weekly coordination meetings with stakeholders and circulate minutes for transparent communication.
- ✓ Implement emerging BIM technologies to automate tasks and streamline project workflows.
- ✓ Conduct risk assessments and develop mitigation strategies to minimize project delays and issues.
- ✓ Oversee quality control processes and ensure adherence to BIM execution standards.
- ✓ Perform constructability reviews and support value engineering initiatives for optimized design outcomes
- ✓ Proficiently manage the BIM team, providing guidance and training while also reviewing and tracking BIM performance to ensure compliance with established standards.

SOFTWARE PROFICIENCY:

- ✓ Autodesk Revit
- ✓ Naviswork manage
- ✓ AutoCAD
- ✓ Autodesk Construction Cloud (BIM 360)
- ✓ Microsoft Office Suite
- ✓ Bluebeam Revu
- ✓ Diroots Plugin

PROJECT EXPERIENCES:

1. Western State Hospital – New Forensic Hospital (USA)

- **Scope:** Hospital | Concrete Structure with Embedded Details for steel & precast
- **Role:** Senior Engineer
- **LOD:** 300 to 500
- Developed complex 3D concrete models using Autodesk Revit, including embedded detailing for construction documentation.
- Generated and tracked RFIs to resolve design discrepancies and clarify technical details with stakeholders.
- Conducted thorough quality checks on drawings produced by team members to ensure accuracy and compliance with project standards.

2. Shushah Island – Studio Project (Saudi Arabia)

- **Scope:** Mixed-Use Development | Concrete Scope with Substructure Elements
- **Role:** Project Manager
- **LOD:** 300 to 400
- Coordinated directly with clients to address the project requirements & ensure successful execution.
- Maintaining BIM data integrity by aligning all models with the latest design revisions and client standards.
- Identified & resolved design conflicts through effective collaboration with engineers and architects.
- Monitored project timelines, RFIs and data management to ensure smooth workflow and timely deliverables.

3. Bawabah office (Saudi Arabia)

- **Scope:** Commercial Development | Concrete & Steel Structural Works
- **Role:** Senior Engineer
- **LOD:** 300 to 400
- Led BIM coordination and execution using Autodesk Revit for detailed concrete modeling and fabrication-level outputs.
- Participated in project review and coordination meetings to ensure alignment with client requirements and design intent.
- Identified and resolved model clashes within defined tolerances to maintain workflow continuity.
- Developed and implemented the BIM Execution Plan (BEP) and ensured adherence to COBie standards.

4. Jewar International Airport – Studio project (India)

- **Scope:** Airport | Structural & Architectural Packages (FOH & BOH Areas)
- **Role:** Executive Engineer
- **LOD:** 300 to 400

- Developed structural and architectural BIM models for FOH and BOH areas, ensuring coordination with MEP services.
- Produced detailed models and shop drawings in compliance with client specifications and quality standards.
- Coordinated between the back-office design team and site execution teams to streamline project delivery.
- Raised and tracked RFIs to ensure prompt resolution of design issues and maintain project timelines.

5. Shura Island Program 07, Hotel Central 1 (Saudi Arabia)

- **Scope:** Commercial | Concrete & Steel Structural Works
 - **Role:** Executive engineer
 - **LOD:** 300 to 400
- Handled initial project setup, including template creation and model structuring in Revit.
 - Conducted model and drawing reviews to ensure quality and compliance with project standards.
 - Prepared and tracked RFIs and resolved technical issues and model errors within Revit environments.

6. King Salman Air Base project (Saudi Arabia)

- **Scope:** Airport | Structural & Architectural Packages
 - **Job Role:** Trainee Engineer
 - **LOD:** 300 to 400
- Assisted in Revit model updates and upgrades to reflect design changes and coordination requirements.
 - Prepared 2D shop drawings in alignment with project specifications and supported quality control processes.
 - Gained hands-on experience in BIM documentation workflows and cross-disciplinary coordination.

EDUCATION QUALIFICATION:

B.E Civil Engineering from NPR college of Engg & tech
(CGPA : 8.5/10)

(Year of passing: 2022)

CERTIFICATE COURSES COMPLETED:

- Courses on Autodesk suite - AutoCAD

PERSONAL DETAILS:

Gender	: Female
Marital Status	: Single
Nationality	: Indian
Languages Known	: English & Tamil
