

SIVASANKARI

BIM Modeler-(Structure & Architecture)

- **Graduate:** with 70% Bachelor's in Civil Engineering- 2019 batch.
- **HSC:** with 85% studied at Standard High School-2017 batch.
- **SSC:** with 92% studied at Standard High School-2015 batch.

CAREER SUMMARY

- Working as a BIM Executive engineer and having 2+ years experience in the Digital Construction Field.
- Assisted with engineers and architects which include conceptual plans, design, 3d views, Elevation, detailed drawing and schedules.
- Eager to learn new software's to enhance knowledge and have ability to grasp knowledge in lesser time.
- Preparing engineering drawings.

WORK EXPERIENCE

PINNACLE INFOTECH SOLUTION, MADURAI TAMIL NADU

June 2023 – Present

Role & Responsibilities:

- Preparing detailed drawings for construction includes plan, site plans, Elevation, Section & Design Detail.
- Creating and maintaining 3D models using Revit software
- Collaborating with Architects, engineers and other members of the design and construction team.
- Ensuring the models are accurate and meet project requirements.
- Using the models to identify and resolve conflicts or issues during the design phase.
- Preparing schedule and QTO for the Architecture model using Revit software.
- Reducing Clashes using Autodesk Navisworks Manage.

PROJECT EXPERIENCE

- Project Name: New Forensic Hospital
Location: US
- Project Name: New Phnom Penh International Airport
Location: Cambodia.
Project Name: The Avenue Mall
Location: Riyadh, KSA
- Project Name: Shushah Island NEOM Community
Location: Saudi Arabia

ACHIEVEMENTS

- REVIT
- NAVIS WORK
- BIM 360
- AUTODESK
CONSTRUCTION
CLOUD

LANGUAGES

- TAMIL
- ENGLISH

Role & Responsibilities (New forensic hospital(us)):

- Working in the BIM 360
- Created LOD details for LOD 300 to 500
- Preparing detailed 3D modeling in Revit by developing the complex concrete structure and produce the embedded drawing.
- Raising & tracking RFIs for design clarification and issue resolutions.
- Reviewing and performing quality checks on drawings prepared by the team members to ensure accuracy and adherence to standards

Role & Responsibilities (New Phnom Penh International Airport):

- Created LOD details for LOD 200,300,350&400 enhancing model accuracy and detail for construction Phases.
- Perform clash detection using Navisworks Manage and resolve conflict between various trades.
- Raising Queries when there is a lack of information in the project
- Internal collaboration with the MEP team.

Role & Responsibilities (Avenue Mall):

- Analyze client input and project requirements.
- Develop detailed architectural shop drawings that meet LOD 350 standards.
- Ensure drawings include sufficient detail for construction, indicating dimensions, materials and finishes.
- Utilize Revit to create and modify the architectural model based on various inputs including CAD drawings and PDFs.
- Ensure that the model is accurate and reflects the latest design changes and specifications.
- Implement appropriate templates and standards for consistency across the model
- Clash detection & producing clash report with the help of Navisworks Manage.
- Collaborate with MEP and structural team to ensure seamless integration of all services.

Role & Responsibilities (Shushah Island):

- Working in the BIM 360.
- Developed comprehensive shop drawings based on client input and created detailed Revit models from CAD drawings and PDF documents.
