ABOUT ME

Detail-oriented Civil Engineer with a strong background in Building Information Modeling (BIM), specializing in the use of Revit, AutoCAD, for infrastructure and structural projects. Over [2] years of experience in designing, modeling, and coordinating civil engineering projects from concept to execution. Proven ability to collaborate with multidisciplinary teams, detect clashes, and improve project efficiency through 3D modeling and data integration. Passionate about leveraging digital tools to drive sustainable and efficient construction solutions.

EDUCATION

2018 - 2021	Bachelor of technology in civil engineering
Prist University	B.Tech Civil Engineering graduate with a passion for Building Information Modeling (BIM), seeking to contribute technical and design skills to innovative infrastructure projects.
2015 - 2018	Diploma in civil engineering
MIET college	Diploma Civil Engineer with hands-on experience in field execution, seeking to contribute to on-site project supervision and quality control.

EXPERIENCE

Jan 2024 - Aug 2024	Site engineer
Bright oasis construction company(Dubai)	Supervised on-site construction activities, ensuring work execution aligned with technical drawings and project specifications. Coordinated with contractors and engineers to maintain quality, safety, and project time.
June 2022- Nov2023	Civil Technical Support Engineer
RGS Construction Technologies Pvt Ltd(Chennai, India)	Provided technical assistance in civil engineering design and documentation, ensuring accuracy in BIM models and CAD drawings. Collaborated with design and site teams to resolve technical issues and improve project coordination.

SKILLS

- Bim modeler(revit)
- Autocad
- Zwcad
- Rebar software
- Microsoft Tools
- Leadership
- Customer handling
- project submission

PROJECT:

2D and 3D planning for residential and commercial buildings (G+15 and above)

- Developed detailed 2D and 3D plans for high-rise residential and commercial buildings exceeding G+15 floors using AutoCAD and Revit.
- Collaborated with architects, engineers, and consultants to resolve design conflicts and optimize space utilization.
