SKILLS

- Project Management
- Public Relations
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

SOFTWARES

- AutoCAD
- Revit
- Navis work
- HAP
- DUCT SIZER
- Solidworks
- MS Office
- Power point

PROFILE

Experienced MEP BIM Modeller in creating accurate and detailed 3D models for mechanical, electrical, and plumbing systems. Proficient in using Autodesk Revit, Navisworks, and other BIM software to deliver high-quality models that meet client requirements. Strong understanding of building services engineering principles and codes. Collaborative team player with excellent communication skills, able to work effectively with architects, engineers, and contractors to ensure seamless project delivery.

CAREER OBJECTIVE

Highly dedicated and certified MEP Modeller having 2 years of experience. Seeking an opportunity with growing and dynamic organization where I can develop my skills, continue to advance in my career and be able to contribute to the growth and success of the organisation.

WORK EXPERIENCE

Gulftech Design Solution LLP (Coimbatore – Tamil Nadu)
2024 – Present

Projects involved

- Labour Accomodation G+8 at Jaber Ali, Dubai.
- GEEPAS Building (2B+G+19+Roof) at Al Barsha, Dubai.
- (B+G+4) Residential Building at JVT, Dubai.
- (B+G+2p+34+R) Residence Commercial Building at Al Barsha, Dubai.

RESPONSIBILITIES

- Developing Designs, Drafting, shop and as built drawings by using AUTODESK REVIT and AUTOCAD Softwares.
- As per requirement and MEP execution plan, Preparing shop drawing and as-built drawings for the disciplines like HVAC, FIRE FIGHTING, PLUMBING, DRAINAGE as well as the project coordination drawings.
- Making BOD, BOG, BOP Calculations for proper coordination.
- Preparatipn of various LOD drawings and shop drawings for MEP systems.
- Review the input drawing and models to prepare the list of queries to the customer.
- Creating FAMILIES and SECTIONS presentation in REVIT.
- Essential calculations for MEP services like Heat and Cooling loads, Ductsizer,Pipe sizing by using softwares.
- Converting AUTOCAD drawings to REVIT 3D.
- Using AUTOCAD and REVIT to modelling the MEP Services like HVAC, Plumbing,Fire Fighting and Drainage systems.

EDUCATION

BE - Mechanical Engineering

RVS College of Engineering and
Technology, Coimbatore,TN,India.
CGPA = 8.2%
2019 - 2023

HSC

Kalvi Matric.Hr.Sec.School,
Oddanchatram,Tamil
Nadu,India.
2017 - 2019

SSLC

Premier Hi Tech Matric.Hr.Sec.
School,oddanchatram,TamilNadu,
India.
2016 - 2017

PERSONAL DATA

Father's Name:Selva Kumar.N
Dob: 19/06/2002
Gender: Male
Nationality: Indian
Marital status: Single

- Identifying the interference between different services,re-routing as per services,architectural, Structural plans and generating the sections as required.
- Responsible for creating the drawings as per the standards and requirements are given by the clients and for updating the drawings as per the corrections marked by the Engineer.

Comfort World (Coimbatore – Tamil Nadu)
2023-2025

Projects involved

Residential Building

- Designed Centralized Variable Refrigerant Flow (VRF) System For Residential Buildings

Commercial Building

- Designed Centralized Variable Refrigerant Flow (VRF) System For Commercial Buildings

RESPONSIBILITIES

- Created Detailed HVAC layout Drawings using AutoCAD
- Designed HVAC systems (heating, ventilation, and air conditioning) for commercial, residential, and industrial projects
- Performed load calculations to determine equipment capacities and duct/pipe sizing
- Developed detailed HVAC design drawings using AutoCAD for coordination with architectural and structural plans.
- Selected appropriate HVAC equipment (VRF systems) based on system requirements and client specifications.
- Created and reviewed mechanical specifications, bill of materials (BOM), and construction documents for HVAC systems.
- Coordinated with multidisciplinary teams including architects, electrical and structural engineers to ensure integrated building design.
- Conducted site surveys and attended client meetings to assess HVAC needs and gather project requirements.
- Supported project cost estimation and budget development for HVAC systems &
- Provided technical support during construction phase including submittal review and field inspections.
