

Name	Saswati swain
Permanent Address	At/Po:- Odisho , Dist:-Jagatsinghpur Odisha,754103
Current Address	F-24,Chandrasekharpur,Bhubaneswar
Telephone	9861007932
Email	Swainsaswati128@gmail.com

Skills & Qualifications

Key Skills	Quick Learner, Best Team player, Honesty and confidence, Maintain a positive and professional attitude.
Education	B-Tech (Civil Engineering) Trident Academy of Technology, BBSR
Software Skills	AutoCAD, Revit Arch & Structural Navisworks, BIM 360/ACC, Revit Plugins.
Occupational field	BIM Engineer
Desired employment	Full-time long-term association

Professional Profile:

I am a professional Civil Engineer with 2 years of experience in providing top-tier engineering solutions for multidisciplinary projects.

My expertise includes:

- Extensive knowledge in Concept Design, Schematic Design, Design Development, Construction, and Shop Drawings.
- Resolving critical issues and preparing interoperable solutions to convert models to BIM formats.
- Overseeing the production of drawings from LOD100 to LOD500 stages.
- Leading and coordinating teams, managing daily activities, and ensuring timely task completion.
- Preparing Revit Model strategy to maintain smooth workflow.
- Developing BIM models from Concept design (LOD 100) to As-Built Drawings (LOD 500).
- Creating and editing Parametric Families, quality checking project sheets, performing Quantity take-offs, and preparing Bills of Quantities (BOQ).
- Preparing Clash Reports, raising RFIs, and maintaining error-free BIM models through continuous updates.
- Utilizing Revit plugins to enhance productivity and conduct audits.
- Ensuring BIM processes and deliverables align with ISO 19650 standards.
- Create custom revit families, or modify existing revit families based on project requirement.
- Following a BIM Execution Plan to standardize model delivery methods, naming conventions, and collaboration protocols
- Producing construction documents, including plans, sections, elevations, and schedules in sheet creation.
- Ensuring that all drawings and specifications are accurate and meet project requirements and standards.
- 3D Visualizations: produce 3D renderings and visualizations to help clients and stakeholders understand the design concepts.

ROLE AT BIMEDGE PRIVATE LIMITED

1ST OCTOBER 2022 TO TILL DATE

My roles have included BIM engineer and BIM Coordinator, in BIMedge private limited

Glimpse Of Projects:-

1) Project: PURI RAILWAY STATION, PURI

Scope: To prepare BIM model and scrutinize the project through BIM deliverables. The BIM scope was to develop a model to LOD-500 (As - built stage) Currently, it is LOD-400 .

Project role: BIM ENGINEER; Creating and developing 3D models of station building using Autodesk Revit. Incorporating architectural, structural, and MEP (Mechanical, Electrical, Plumbing) components into the BIM model. Facilitate collaboration among EPC contractors, PMC including architects, engineers, contractors, and facility managers. Generate visualizations and simulations to help PMC better understand the project design and its impact. Creation of transmittal for client review and feedback and Extracting quantities and BBS directly from the BIM model.

2) Project: VISAKHAPATNAM RAILWAY STATION

Scope: To prepare BIM model. The BIM scope was to develop a model to LOD-500 (As - built stage).

Project role: BIM ENGINEER; Preparation of LOD 350 Architecture model.

3) Project: AI-SOUK JUBAIL APARTMENTS, ABU DHABI, UAE.

Scope: To develop model from LOD-300 to LOD-500 as per modification done at site.

Project role : Modeling, Detailing and Documentation of water supply ,Fire Protection Service and MEP as per CAD drawings. Conduct clash detection analysis and prepare and resolve clash detection report using revit.

4) Project: KENDUJHAR CANCER HOSPITAL

Scope: To prepare BIM model. The BIM scope was to develop a model to LOD-500 (As - built stage).

Project role: I worked as a BIM Modeler on this project, contributing to the development of the Architecture model in LOD 300 & Structure model in LOD 400 .

5) Project: BANGALORE INTERNATIONAL AIRPORT TERMINAL 2

Project role: BIM ENGINEER; Developing Design development to As-Built stage Drawings Coordinating with all other disciplines, Resolving RFI's received from Site. Creating families as per the material submittal & Shop Drawings. Updating the red line mark-up's as per Site .

6) Project: BUBANESWAR METRO (DMRC)

Scope: To prepare BIM model. The BIM scope was to develop station building & viaduct model to LOD-500 (As - built stage).

Project role: Responsible for developing of Structural & Architectural BIM model of sub-structure & super structure of the viaduct in between station . Submitting the structure drawing for approval in BIM 360 PORTAL. Creating submission workflow .Coordinating with other consultant for preparing combined model of the entire package .
