Executive Summary:

As a Mechanical Engineer, started my BIM Career as a drafter, Modeler and then Designer roles for Residential, commercial projects for the past 5 years, keen to learn current Building Information Modeling methodologies & techniques and always eager to learn new software & technical skills for professional growth of my career.

Educational Qualification

B.E., Mechanical Engineering – 2015 to 2018

7.78 CGPA – PSNA College of Engineering & Technology (Anna University), Dindigul

D.M.E., Mechanical Engineering – 2012 to 2015

89% – Alagappa Polytechnic College (DOTE), Karaikudi

Software Proficiency

- AutoCAD
- Revit MEP
- Microsoft Office
- Navisworks
- Solidworks

Experience:

 **Expand Construction Pte Ltd, Singapore: (External support for BIM Services)**

(Apr 2024 - Present)

Role: M&E Bim Modeler – HDB Residential Projects

Responsibilities:

- To check on the M&E Specifications and drawings / models
- To coordinate with Subcons for the drawings / model updates
- To work with with subcons and model M&E services in the model
- To prepare CSD and penetration drawings
- To discuss BIM coordination meetings with subcons / project team members for clashes coordination.

✚ **EPG Building services Pte Ltd, Singapore:** (Sep 2023 – Apr 2024)

Role: Mechanical Engineer

Responsibilities: Mainly focusing on M&E Pump installation & Electrical – Lighting & Power installation for commercial projects.

- To manage and co-ordinate activities on Water pump system installation for multi-storey condominiums.
- Electrical lighting & power installation for commercial buildings.
- Preparing SLDs and BOQ using AutoCAD software
- To carry out Procurement of Water pumps, Electrical containments
- To liaise with Suppliers for material procurement like water pump systems and Electrical items
- To coordinate day to day facilities management activities for multi-storey MCST residential condominiums & Commercial office spaces.

✚ **Lupiter technologies, Chennai:** (Jan 2023 – Aug 2023)

Role: BIM Coordinator / Trainer

Project :

- To conduct online training sessions on BIM Softwares like Revit, Navisworks & AutoCAD for engineering students & working professionals

✚ **Bim Sector, Singapore:** (Sep 2022 – Dec 2022)

Role: BIM DESIGNER /COORDINATOR (Freelancer)

Responsibilities: Mainly focusing on BIM Modeling & Clash detection

Project: 11-storey 170,000 sqm Data Centre project by Fortis Construction, Singapore.

- Electrical modeling for lighting, cable trays, cable ladder elements as per design requirements.
- To coordinate with the team as well as stakeholders to ensure space management for different services.
- To attend meetings with project stakeholders for project workflow and also for preparing clash-free models.

✚ **Abhinav Engineering Solutions – Exyte (M+W), Hyderabad, Telangana:**

(Feb 2022 – Sep 2022)

Role: REVIT MEP DESIGNER

Responsibilities: Mainly focusing on AutoCAD Layouts, BIM Modeling, Family creation on Low voltage devices & Clash Detection

Project: Industries like pharma, Semiconductor fab projects in US & Ireland.(Intel Confidential)

- Preparation of CAD layouts as well as modeling Extra Low Voltage services like Telecommunication systems, Wifi, CCTV, Public Address system elements as per design requirements.

- Coordinate with the team for the submission of drawings at various design stages.
- Clash detection and Preparation of Sheets as per CAD standards and procedures.

 **Bim vision designs pvt ltd, Karaikudi:** (July 2021 - Jan 2022)

Role: BIM MODELER MEP / DRAFTER

Responsibilities: Mainly focusing on AutoCAD drafting, Revit modeling for Residential & Infrastructure projects

- Responsible for preparing of shop drawings with the help of tender drawings as per client requirements.
- Preparation of 2D Floor plans with appropriate M&E services.
- Coordinate with architectural, structural plans and elevations while drawing multiple M&E services drafting.
- Drafting of Plumbing & Sanitary, Fire Fighting, ACMV & Electrical in both AutoCAD and Revit MEP versions
- Frequent update on drawings as liaise with contractors, if any changes in the construction site.
- Periodical Co-ordination meetings with Consultants, Contractors and with BIM Managers.
- Work with 3D models for designing the actual view of the project using REVIT software under efficient Level of Detailing.
- Multiple M&E services can be drawn as BIM Models with their appropriate components and connections as per standards.
- Preparation of required families for the above-mentioned models using REVIT tool.
- Sheet setting for different levels of buildings and also prepare COMBINED SERVICES DRAWINGS (CSDs) where Clash detections can be concluded.
- As-built drawings to be produced as per client considerations in site.

Academic achievements:

- Secured First Class in Bachelor's Degree and with **distinction** in **Diploma**.
