EDUCATION

Bachelor's degree in civil
Kongu Engineering College
2019-2023

SOFTWARE SKILLS

- Revit Architecture
- AutoCAD
- Autodesk ReCap
- Tekla Steel
- Bluebeam
- BIM 360
- Naviswork

TECHNICAL SKILLS

- Project Management
- Communication
- Learning Agility
- Documentation Discipline
- 3D modeling
- Curiosity & Experimentation

INTRODUCTION

BIM Modeler with 2 years of experience in 3D modeling, project coordination, and documentation for architectural projects. Skilled in Revit, Navisworks, and AutoCAD. Focused on delivering accurate, organized models that improve project efficiency. Strong team player with a keen eye for detail and a passion for problem-solving. Always looking for opportunities to learn and grow in the BIM field.

PROFESSIONAL EXPERIENCE

PINNACLE INFOTECH SOLUTION

JULY 2023 - PRESENT

New Phnom Penh International Airport- Cambodia

Tools Used: Revit, AutoCAD, Navisworks

- Developed LOD details (200, 300, 350, and 400) to improve model accuracy and detail throughout construction phases.
- Conducted clash detection using Navisworks Manage, resolving conflicts between trades to ensure smooth project execution.
- Prepared RFIs, documented issues, and communicated directly with clients to resolve queries.
- Collaborated with the MEP team to ensure coordinated and efficient project delivery.

L&T: IKEA - Gurugram, India

Tools Used: Revit, AutoCAD, Navisworks

- Worked on 3D models at LOD 350, ensuring high accuracy and detail for construction stages.
- Coordinated with multidisciplinary teams to resolve clashes using Navisworks.
- Raised queries and flagged information gaps in the project to ensure smooth progress.
- Collaborated internally with the MEP team to ensure effective integration and project alignment.
- Prepared RFIs, documented issues, and communicated directly with clients to address concerns.

SOFT SKILLS

- Presentation Skills
- Active Listening
- Verbal and written communication
- Adaptability & Growth

LANGUAGE

- Tamil
- English

Dubai Healthcare City Hotel and Residence Project – Dubai

Tools Used: Revit, AutoCAD

- Worked on facade shop drawings at LOD 400 and façade modeling at LOD 300 to ensure detailed and accurate representations.
- Performed quantity take-offs based on client requirements to support project planning and budgeting.
- Created parametric families in Revit, tailored to shop drawings and specific project needs.
- Prepared RFIs, documented issues, and communicated directly with clients to ensure clarity and resolve concerns.

The Avenue Mall - Riyadh Saudi Arabia

Tools Used: Revit, AutoCAD, Navisworks

- Worked on structural and architectural shop drawings and models at LOD 350 for accurate project representation.
- Created sheets, view templates, and schedules in Revit to streamline project documentation and presentation.
- Developed parametric families in Revit based on shop drawings and specific project requirements.
- Coordinated with multidisciplinary teams to resolve clashes using Navisworks, ensuring seamless project integration.
- Prepared RFIs and managed documentation to address project queries and ensure timely resolution.
- Collaborated closely with the MEP team to maintain alignment and enhance project coordination.
