20. Matching Jobs

1. User Registration Workflow

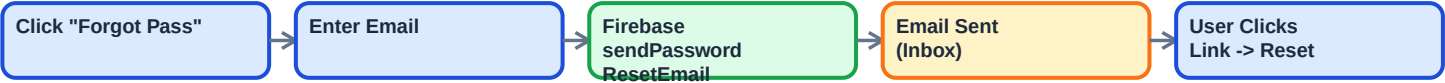

Form fields: firstName, lastName, mobile, email, password
Firebase Auth creates user with email/password
Firestore doc at users/{uid}: { uid, email, firstName, lastName, mobile, role:"user", createdAt }
On success: toast "Registration successful!" -> navigate /home

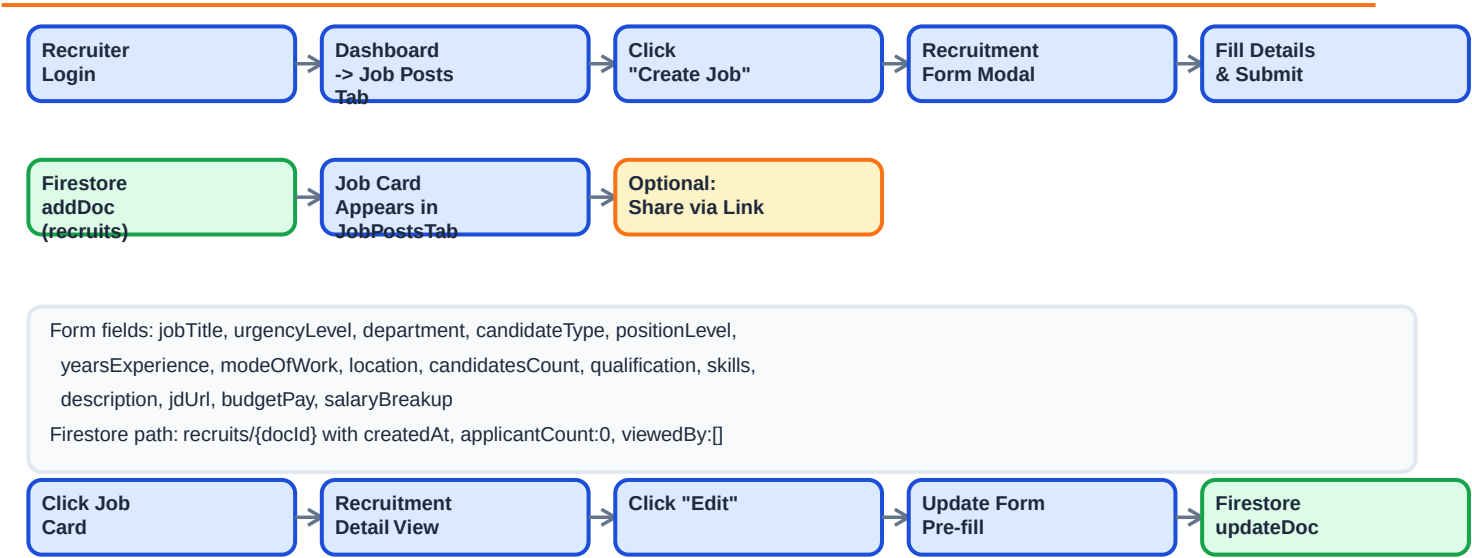

2. User Login Workflow

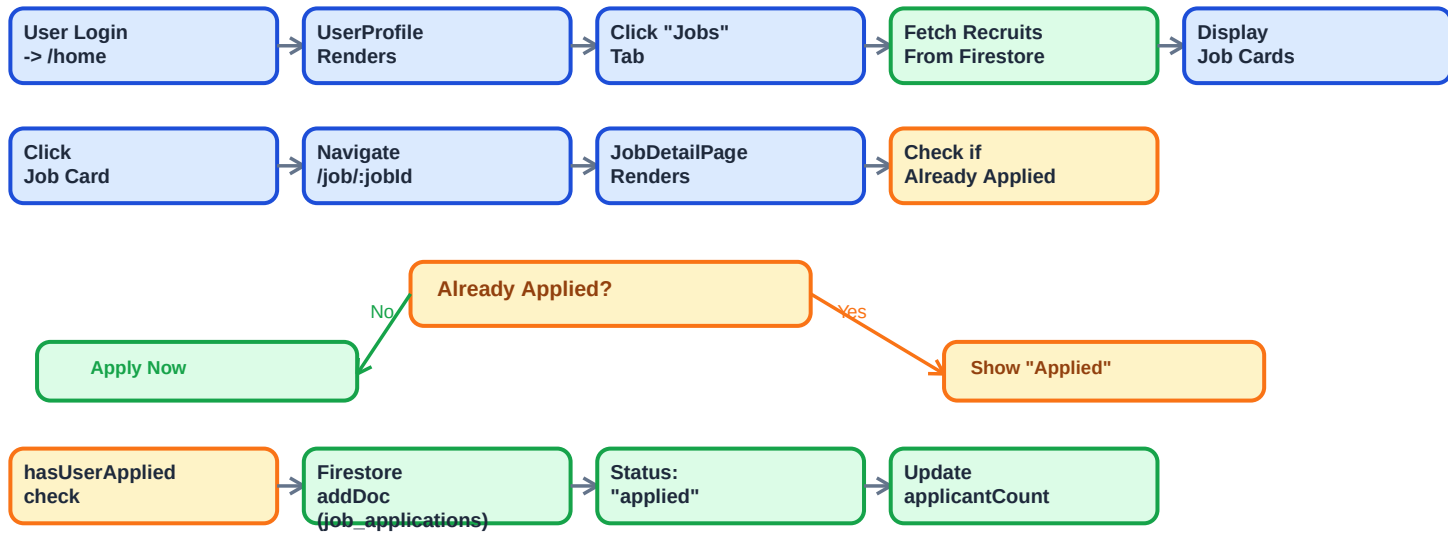

3. Password Reset Workflow

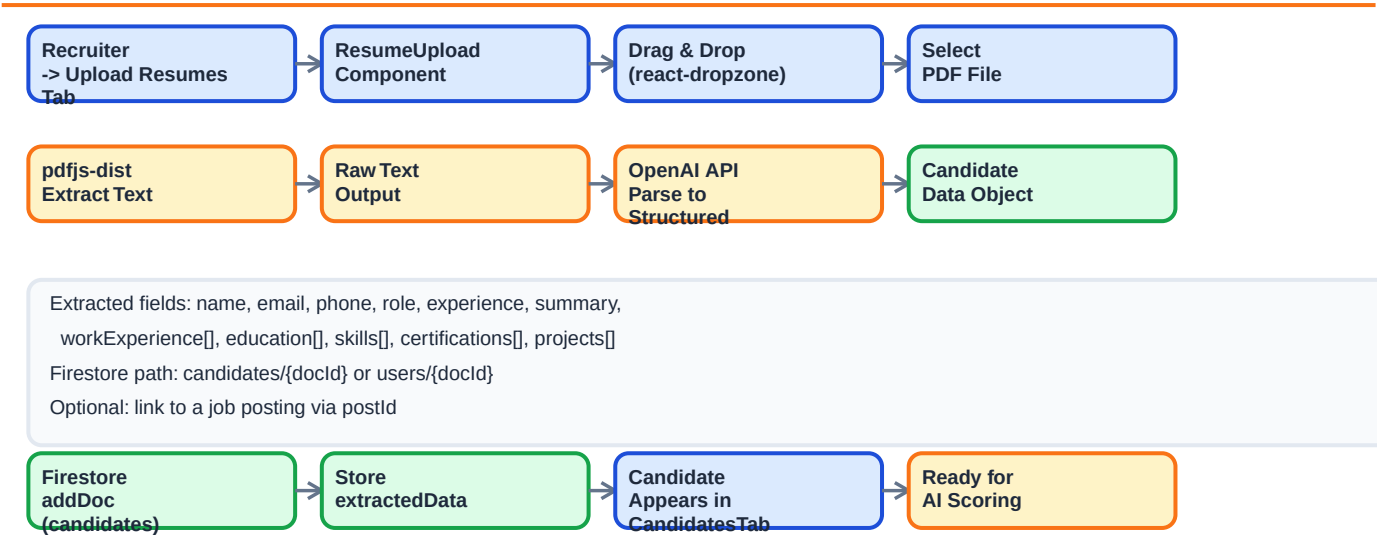

4. Job Posting Workflow (Recruiter)

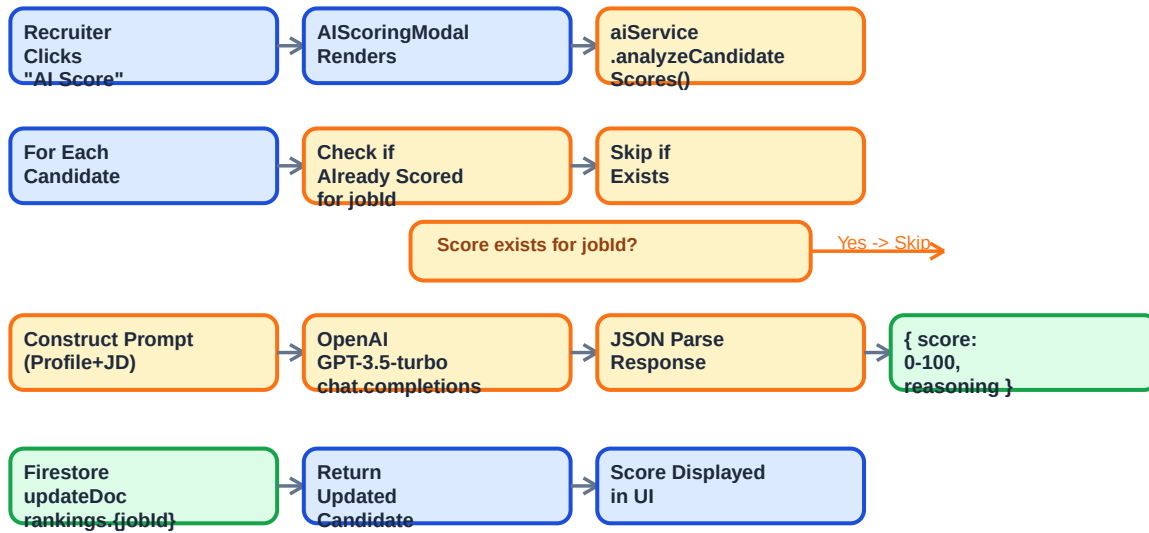

5. Job Browse & Apply Workflow (User)

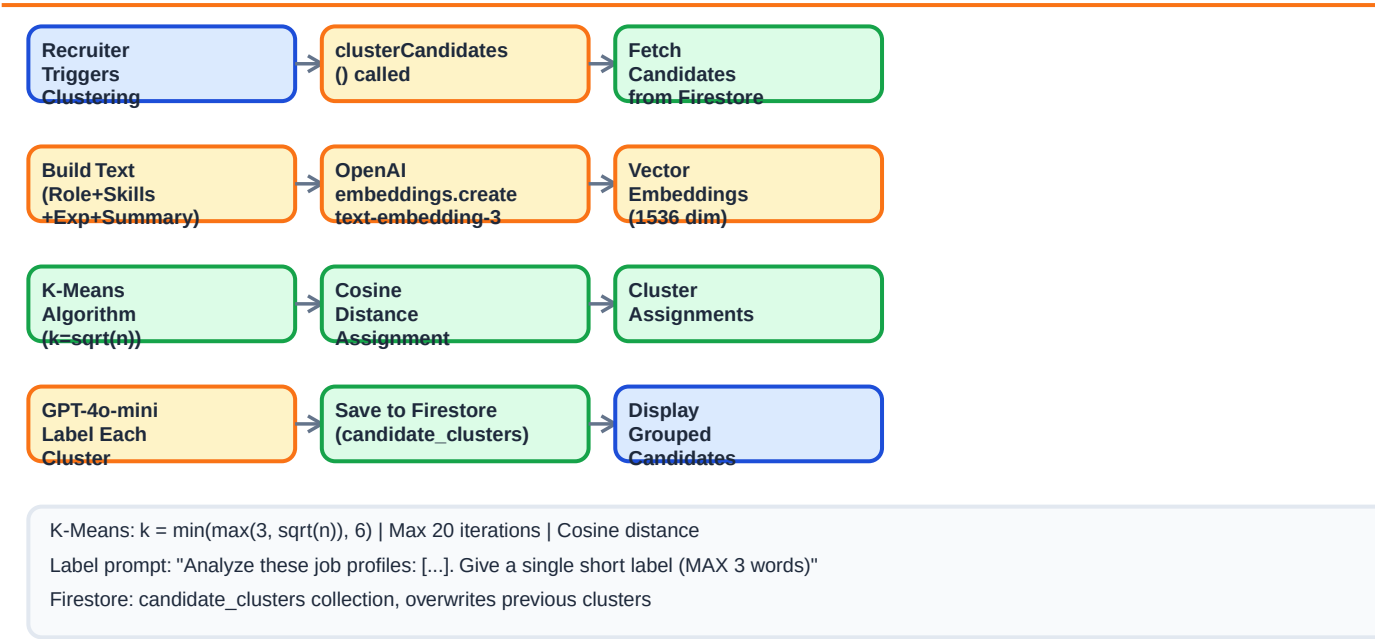

6. Resume Upload & Parse Workflow

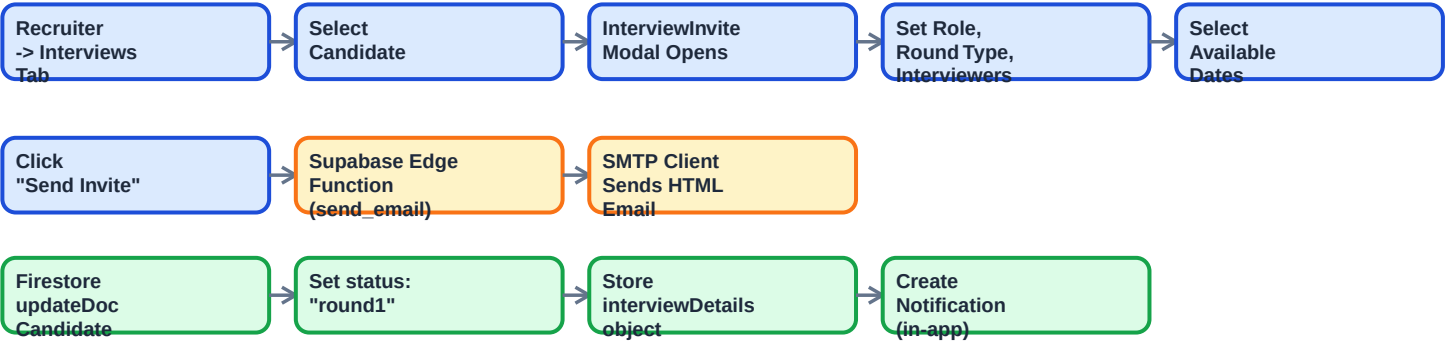

7. AI Candidate Scoring Workflow

8. Candidate Clustering Workflow

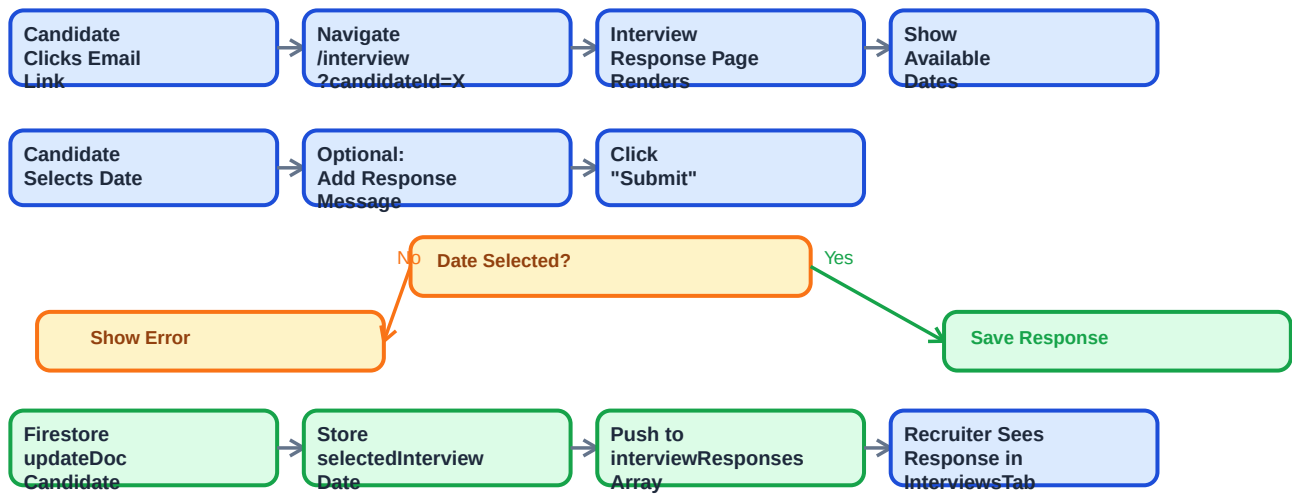

9. Interview Scheduling Workflow

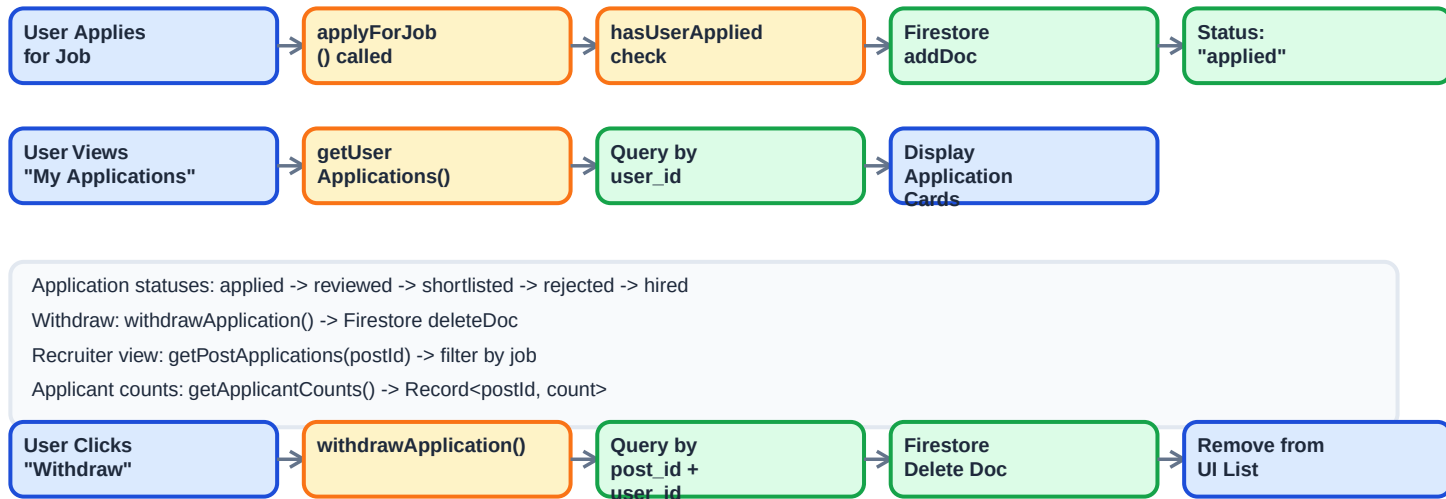

Email contains: role, round type, available dates, interviewer names
Action link: {baseUrl}/interview?candidateId={id}
Decline link: {baseUrl}/api/interview-response?candidateId={id}&response=decline
Interviewer names displayed in email body

10. Interview Response Workflow

11. Job Application Management

12. Notification System Workflow

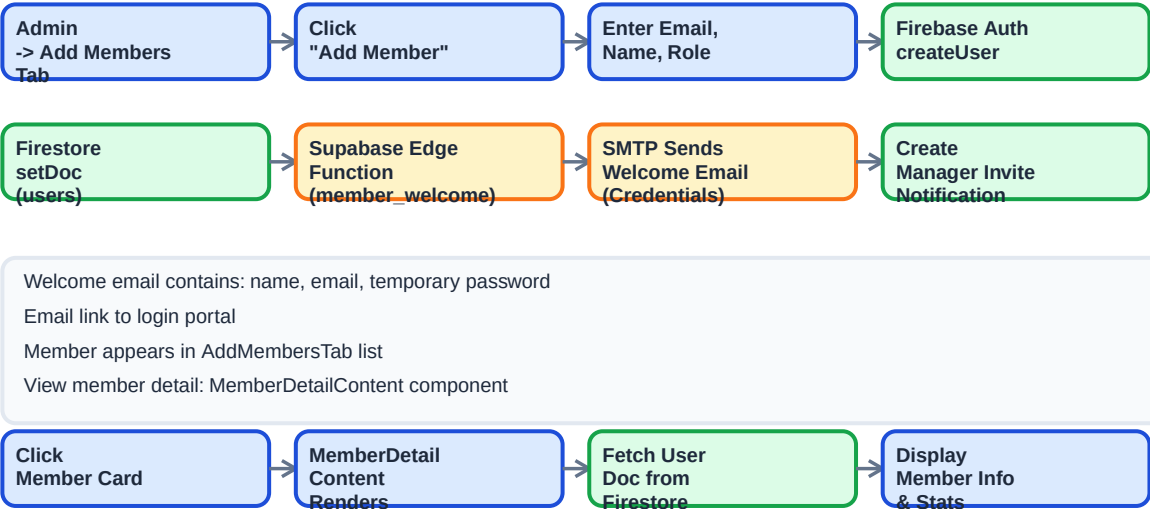

Notification types and triggers:

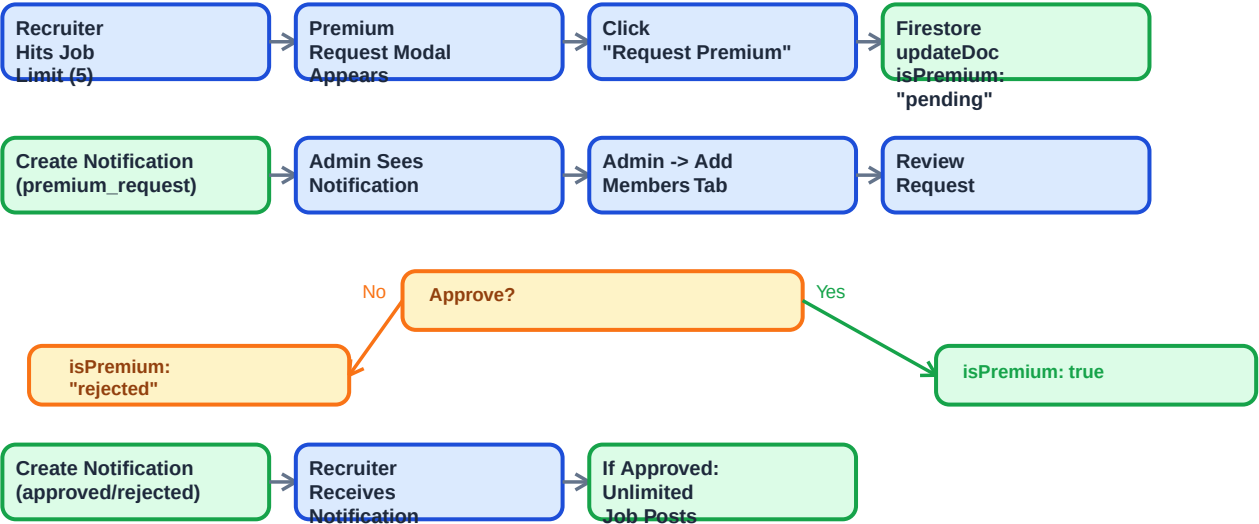

- interview_invite -> Recruiter sends interview invite to candidate
- verify_details -> Candidate needs to verify their details
- congratulations -> Candidate is selected for position
- manager_invite -> Admin adds a new manager/recruiter
- premium_request -> Recruiter requests premium access
- premium_approved -> Admin approves premium request

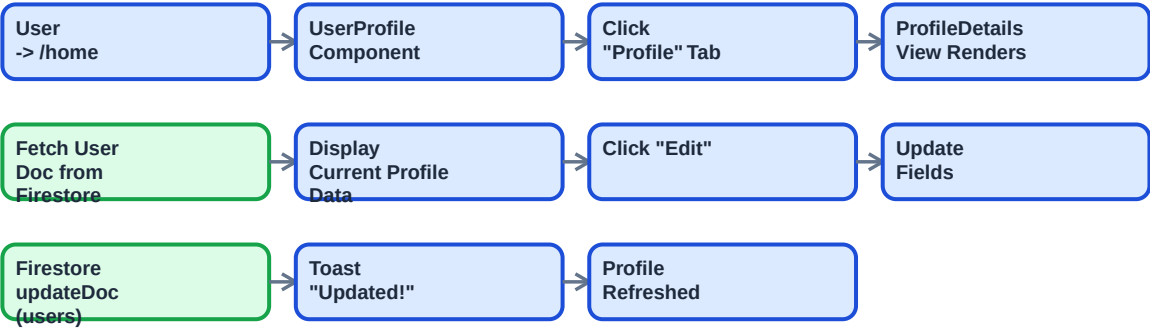

13. Member Management Workflow

14. Premium Access Workflow

15. Profile Management Workflow

Editable fields: name, email, phone, role, skills, experience
Profile shows: extracted resume data, education, work history
StandardResumeTemplate: renders formatted resume view

16. Personalized CV Workflow

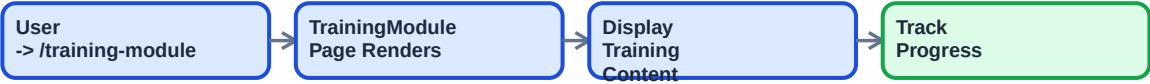

OpenAI generates tailored CV based on user profile
Uses extracted resume data + skills + experience
PDF download available via jsPDF/html2canvas
Custom layout with Indian Infra branding

17. Analytics Dashboard Workflow

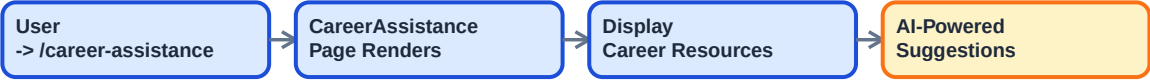

Metrics: total jobs, total candidates, applications, hires
Charts: pie charts, bar charts, line charts (Recharts library)
Filters: by date range, department, status
Role-based: different views for manager vs admin

18. Training Module Workflow

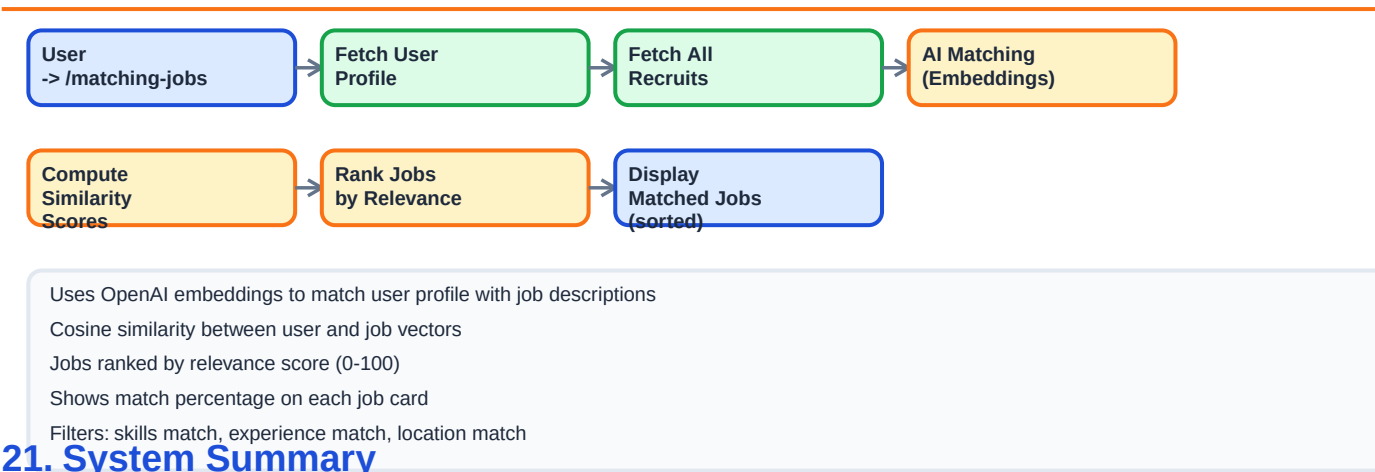

Training content for job seekers
Modules: resume writing, interview skills, industry knowledge
Progress tracking stored in Firestore
Interactive assessments and quizzes

19. Career Assistance Workflow

Career guidance and resources for job seekers
AI-powered career path suggestions based on profile
Skill gap analysis and recommendations
Industry trend insights

20. Matching Jobs Workflow

21. System Summary

Complete Workflow Coverage:

- 6 Auth workflows (registration, login, password reset, role routing, logout, session)
- 5 Job workflows (posting, editing, browsing, applying, withdrawing)
- 3 AI workflows (scoring, clustering, job matching)
- 3 Interview workflows (scheduling, response, tracking)
- 4 Management workflows (members, premium, notifications, analytics)
- 4 User workflows (profile, CV, training, career assistance)

Total: 25 distinct workflows covering all application functions
