Professional summary

An accomplished and dedicated Engineer professional with more than 7 years of diversified experience in the Senior BIM Engineer, I've worked in commercial, residential and documenting projects for Private sector clients. Implemented strategies for successful completion of projects in BIM.

Core Qualifications

- To Create Shop Drawings of various in 2D using with Auto-Cad.
- Adept in Scan to BIM Modelling.
- Adept in Parametric family creation.
- Strong familiarity with AutoCAD and Revit software.
- To Develop High Quality & Error free Structural 3-D Models using with Revit.
- Troubleshoots & provides solutions for Autodesk Revit.

Professional Experience

COMPANY: DB ENGINEERING & CONSULTING, BANGALORE, Sep2021-Present

DESIGNATION: Senior BIM Engineer.

Job Description:

- Developing Complex Bridge 3D Modelling Structures as per the Standard guidelines.
- Preparing 2D plans and sections as per the standards and collaborating with the design team.
- Provide Clash free model with the help of Navisworks.
- Maintain proper records of all issued & received models/drawings, Clash Reports, RFIs, BIM Register.
- All models are developed in line with the BIM Execution Plan (BEP) to achieve client requirement
- Developing 3D Models by the received Point cloud Data for Railway bridges, Station structures etc.

Project Description:

FuGe, German

- To Prepare Structural 3-D Model of around 40km by given data with LOD 300.

Nersingen, German

- To Develop 3-D Model from the cad data with respective LOD 300 of Steel bridge and creating shop drawings.

Niebull & Digitaler Knoten Stuttgart, German

- To Develop 3-D Model from the Point cloud data in Bim 360 of Gis2Bim Whole city of entire Railway station etc.

COMPANY : Larsen & Toubro (L&T), Chennai Jan 2021 - Aug 2021

DESIGNATION : BIM Engineer, Contract (THE BIM ENGINEERS)

Job Description:

- Responsible to create 3d models using information from 2d drawings
- To create geometry in BIM models, insert information to project and maintain project BIM standard.
- Responsible in development of as built structure document creation and maintenance.
- Maintain BIM model as per BIM standard and provide detail as per requirement
- Managing the preparation and coordination of assembly drawings and erection plans.

Project Description:

National High Speed Rail Corporation Limited:

- Revit model developing from given data in cad and pdf.
- Developing 3d models in structure and architecture and checked with Navis Work Manage and BIM 360 for clash detection.
- Create a sheet for shop drawing with detailing and maintain the BIM standard.
- Creating customized Revit families as per client specification.

COMPANY : Zahdah Engineering Pvt Ltd Sep 2019 - Dec 2020

DESIGNATION : BIM Engineer

Job Description:

- Responsible to create 3d models using information from 2d drawings
- To create geometry in BIM models, insert information to project and maintain project BIM standard.
- Responsible in development of as built structure document creation and maintenance.
- Maintain BIM model as per BIM standard and provide detail as per requirement.
- Responsible coordinates against overall delivery requirements.

Project Description:

EXPO 2020, Dubai:

- Revit Model developing from given data in forms of Cad and images.
- Developing 3D Models in Architecture and structure and checked with Navis work manage for clash Detection.
- Create a sheet for shop drawing and maintain the BIM standard.
- Creating customized Revit families as per client specification.

COMPANY : One Works BIM Technology (Belongs to BTTS) April 2018 – Aug 2019

DESIGNATION : BIM Modeler Structure

Job Description:

- Responsible in development of as built structure document creation and maintenance.
- To create geometry in BIM models, insert information to project and maintain project.
- Developing 3D Models in Architecture and Structure and checked with Navis work manage for clash Detection.
- Creating viewpoint in Navis work manage for quality checking in model.

Project Description:

BIMer, France.

- Creating 3d model of Commercial buildings, Apartments and row houses with use of point clouds and 2d drawings.
- Quantity and material take off and make a report as per standard

3ds Max

- THEOSPICAL SOCIETY Adyar, Chennai.
- Creating best high quality animation video with V-Ray rendering.
- Creating landscape model in Revit from Auto Cad and pdf.
- Applying Texture and making video rendering for that landscape.

COMPANY : BTTS

Oct 2017- March 2018

DESIGNATION : BIM Modeler Structure & Arch

Job Description:

- Responsible in development of as built structure document creation and maintenance.
- To create geometry in BIM models, insert information to project and maintain project

Project Description:

City Mapping, Netherland.

- Creating 3d model of Commercial buildings, Apartments and row houses with use of point clouds and 2d drawings.
- Creating a report for area calculation for building and spaces
-

Education

- Bachelor's Degree in civil engineering with 75% in Sengunthar Engineering College, Tiruchengode, Namakal
- Higher Secondary School Education with 77% in N.S Higher Secondary School, Theni

Declaration

I hereby declare that all the details mentioned above are true and honest to my knowledge.
