

PRAJWAL SADASHIVA

Doha | Qatar | +97433914226/+919481769764 | 30prajwals@gmail.com

OBJECTIVE

Experienced BIM MEP Engineer with expertise in 3D modeling, clash detection, and coordination using Revit, AutoCAD, and Navisworks. Skilled in collaborating with Engineers, Architects, and Project teams to develop accurate and efficient MEP designs. Adept at updating models, generating 2D drawings, managing BIM libraries, and implementing BIM standards and best practices to optimize project workflows. Committed to delivering high-quality MEP solutions while improving efficiency and accuracy in design and execution.

CORE SKILLS

BIM & 3D Modeling: Revit, AutoCAD, Navisworks (Beginner)

Software Proficiency: Revit, Autocad, MS Office

Technical Documentation: Creating as-built models, Assist in BIM execution plans

MEP Design: HVAC, Plumbing, Firefighting, Electrical systems

Standards & Compliance: ASHRAE, NFPA, SMACNA, ISO 19650 (BIM standards)

Project Collaboration: Coordination with Architects, Structural & Civil Engineers

Clash Detection & Resolution: Model auditing, interference checks using Navisworks (Beginner)

EXPERIENCE

BIM MEP Engineer

Al Ghanim International | Doha, Qatar

Nov 2023 - Oct 2024

- Well experienced in BIM within Mechanical, Electrical and Plumbing Engineering.
- Created detailed 3D MEP models using BIM software such as Revit, AutoCAD and Navisworks.
- Collaborated with engineers, architects, and other professionals to gather all necessary information to create accurate models.
- Updated and modified models as per revised plans and specifications.
- Generated and extracted 2D drawings and details from the 3D models.
- Conducted clash detection and prepared clash reports to facilitate coordination meetings.
- Managed the project's BIM library by creating and updating BIM families.
- Contributed to the development and enhancement of BIM standards and best practices within the organization.

Senior Utility Engineer

JH Construction | Doha, Qatar

Apr 2018 - Jul 2023

- Managed the installation, maintenance, and operational management of utility systems, ensuring compliance with design specifications and standards.
- Coordinated with multiple teams and contractors to ensure seamless execution of utility-related tasks.
- Contributed to site surveys, planning, and execution of underground utilities for large-scale infrastructure projects.
- Developed a strong understanding of MEP systems (Mechanical, Electrical, Plumbing), which lays the groundwork for my transition into BIM MEP.
- Handled technical documentation, approvals, and ensured project timelines were met efficiently.

Project Engineer

Phoenix Projects Pvt. Ltd. | Ahmedabad, India

Dec 2015 - Nov 2017

- Managed the design, installation, and commissioning of Mechanical, Electrical, and Plumbing systems for a large-scale Water Treatment Plant (WTP), ensuring compliance with industry standards and specifications (IS, ASTM, API).
- Supervised P&ID interpretation, mechanical design, and hydraulic modeling for various WTP units, including filtration systems, pumping stations, and chemical dosing systems.
- Coordinated with cross-functional teams (design, procurement, and execution) to integrate MEP systems into the plant, facilitating smooth execution and optimal system performance.
- Led the installation of piping systems, HVAC, and electrical control panels, focusing on ensuring effective energy management, water flow, and system reliability.
- Conducted technical site surveys and feasibility assessments to identify potential issues, with a focus on pipeline routing, system integration, and coordination with other utilities.
- Utilized software tools such as AutoCAD and basic design tools for generating detailed design layouts, system diagrams, and installation drawings.
- Managed quality control procedures to ensure the correct installation of materials and systems, in accordance with project specifications, ensuring the final output met operational requirements.
- Compiled technical documentation, as-built drawings, and system manuals to ensure traceability for future maintenance and operational processes.

CERTIFICATIONS & TRAINING

- Autodesk Certified Professional: **Revit MEP, AutoCad**
- Advanced Clash Detection & Coordination – **Navisworks**
- Building Information Modeling (BIM) – **ISO 19650 Training**

EDUCATION

Bachelor Of Engineering - Mechanical

Visvesvaraya Technological University | Karnataka, India

Jun 2015

PROJECTS HANDLED

- **Commercial Buildings:** Modeled & coordinated complete **HVAC, Plumbing & Fire Protection** systems.
- **Infrastructure Projects:** Led MEP integration for **metro stations & highways** using BIM.
- **Water Treatment Plant (WTP):** Designed & managed mechanical and piping systems.

DECLARATION

I hereby declare that all the information given above is true to the best of my knowledge.

Date : 25-02-2025
