

MOHAMMED DANISH

BIM Engineer

PROFILE SUMMARY

BIM Expertise: Specialized in creating detailed structural models using BIM software, enhancing project visualization and coordination. **Technical Knowledge:** Understanding of structural systems, materials, and construction methods. **Software Skills:** Proficient in Revit, Navisworks, and other relevant modeling tools. **Collaboration:** Experience in cross-disciplinary collaboration to resolve design conflicts and improve project efficiency. **Problem Solving:** Effective in identifying issues early in the design process and proposing practical solutions. **Project Experience:** Involvement in a range of projects from commercial buildings to infrastructure, ensuring timely delivery and stakeholder satisfaction.

WORK EXPERIENCE

- Feb 2025 - May 2025

BIM Engineer

Mid Arabia Contracting Company Damma Saudi Arabia

I'm a dedicated Structure BIM Engineer with 2 years of experience in developing and managing detailed 3D structural models using Autodesk Revit. I specialize in producing accurate construction drawings and coordinated models that support collaboration across architectural, MEP, and construction disciplines. My responsibilities include clash detection, structural detailing, and ensuring adherence to BIM standards throughout project phases. In addition to Revit, I have basic working knowledge of Navisworks for clash detection, AutoCAD for drafting support, and BIM 360 for cloud-based project collaboration and model management. I'm passionate about leveraging BIM to improve project accuracy and efficiency and always strive to expand my skills as part of the evolving AEC industry.

expertise in creating detailed BIM models using Revit and AutoCAD. Proficient in structural engineering principles, construction documentation, and clash detection. Adept at collaborating with multidisciplinary teams to ensure project accuracy and efficiency.

Projects

89 Days

Residencial Building, Commercial Building etc.

I am recently working as a Structural BIM Modeler at the Saudi Electricity Distribution Building in Saudi Arabia, with 4 months of hands-on experience. My role involves creating accurate structural BIM models, coordinating with other disciplines, and supporting design and construction teams using tools like Revit and Navisworks to ensure efficient project delivery.
