

SUBASH A

BIM MODELER (MEP - ELECTRICAL)

 Madurai

 annakodisubash@gmail.com

 8220084537

PROFILE SUMMARY

Dedicated Electrical BIM Modeler with over 3 years of experience in modeling and coordinating electrical and ELV systems across large-scale international projects. Skilled in Revit MEP, Navisworks, and BIM 360 for creating LOD 350+ models, clash-free coordination, and delivering detailed shop drawings. Experienced in multidisciplinary collaboration, RFI resolution, and Revit automation tools. Known for precision, reliability, and contributing to project success from design through execution.

EDUCATION

2018 – 2022
SETHU INSTITUTE OF TECHNOLOGY
,KARIYAPATTI,VIRUDHUNAGAR

Bachelor of Engineering in Electrical and Electronics Engineering

CORE

COMPETENCES

- ✓ **SOFTSKILLS:**Detail Oriented
Strong Communicator,
Deadline- Focused,Collaborative.
- ✓ **Electrical & ELV**
CONTAINMENT &
SEDHULE CREATION
- ✓ **Autodesk Revit MEP,**
AutoCAD, Navisworks
Manage,Revizto, BIM 360.
- ✓ **Clash Detection & Coordination**
(Navisworks & Revizto)
- ✓ **PROJECT SUPPORT:**
Shop drawing , Clash Detection,
RFI Handling,AS-Built
Documentation.

WORK EXPERIENCE

Pinnacle Infotech Solutions Madurai, India (OCT2022- PRESENT)

- **Electrical Engineer – BIM & Design (Electrical & ELV)**
Lead electrical and ELV BIM modeling and detailed design for luxury residential , infrastructure projects and Data centre projects.
- Coordinated electrical layouts, single-line diagrams, , containment services, Earthing systems.
- Collaborated closely with QA/QC teams to ensure all models and drawings met client-specific standards and quality benchmarks.
- Conducted clash detection sessions, resolving multidisciplinary conflicts using Navisworks and Revizto.
- Produced coordinated shop and as-built drawings, ensuring design compliance and site readlines.

PROJECT EXPERIENCE

CENTER OF CURIOSITY-AS BUILT- ABU DHABI,UAE

BIM Medeler (Electrical - MEP)

- Executed 3D modeling and shop drawing coordination for electrical and ELV containment systems, including clash detection and resolution with architectural, structural, and MEP disciplines.
- Modeling and shop drawings for Electrical Rooms, ELV Rooms and Riser.
- I have experience in containment services, including creating containment schedules as per IFC standards.
- Experienced with software and platforms such as Autodesk ReCap, HoloBuilder, pyRevit and DiRoots Revit tools eg. for reality capture, 360° site documentation, and BIM workflow optimization.

TECHNICAL SKILLS

- ✓ **BIM Software:**
Autodesk Revit, Navisworks,
AutoCAD , Revizto, Autodesk
Recap, Bim360.
- ✓ **Electrical Design:**
Containment,power layout
,containment schedules.
- ✓ **Project Documentation:**
Construction Documentation,
As-Built Models, Shop Drawings.

LANGUAGES

- ✓ English
- ✓ Tamil

ROSENDIN (FACEBOOK)DATA CENTRE -USA

BIM Modeler (Electrical - MEP)

- Utilized Autodesk ReCap for 3D modeling of conduit systems and conducted clash detection to ensure accurate installation and minimize conflicts in the Rosendin Data Center project.
- Collaborated with project teams to implement quality control measures and improve overall model accuracy.
- Work will be assigned daily in Revizto. The assigned tasks must be completed each day, and coordination with the client is required.

SHURA ISLAND (RED SEA PROJECT) – SAUDI ARABIA

BIM Modeler (Electrical - MEP)

- Developed and coordinated BIM models for electrical and ELV systems on international projects.
- Executed containment services individually for 3 floors and Coordinated with multiple disciplines to perform clash detection and resolve conflicts efficiently
- Developed and delivered detailed 3D modeling for power services according to IFC standards
- Completed shop drawings for containment services & Power services in redline with project and regulatory requirements.

THE AVENUE MALL-RIYADH,SAUDI ARABIA

BIM Modeler (Electrical - MEP)

- Supervised internal quality assurance and control activities.
- Ensured coordination of 3D models across multiple building services.
- Supported technical operations and maintained accurate project records.
- Deployed automation tools including DiRoots and Pi-VDC to enhance workflows.
