

Certified BIM Engineer | 3D Modeling, Clash Detection & Quantity Take-Off Expert

[LinkedIn](#)

Chennai, India

+91-7010430389 / 9789974595

bhargavi95.civil@gmail.com

Offering ~1 year of experience in developing and managing 3D infrastructure models using industry-leading tools like Revit, Navisworks, AutoCAD, and BIM 360. Proficient in clash detection, 4D simulations, quantity take-offs, and producing precise shop and as-built drawings for large-scale international projects in Maldives & USA. Possess a strong foundation in civil engineering and a versatile project portfolio covering architectural, structural, and MEPF disciplines. Known for strong collaboration, adaptability, and problem-solving skills. Committed to deliver data-driven solutions and contributing to the seamless integration of BIM processes across project lifecycles.

CORE SKILLS

Building Information Modeling Projects | Revit Architecture | Revit MEP | AutoCAD | Navisworks | Clash Detection | 3D Modeling | 2D Shop & Submittal Drawings | Architectural & Structural BIM | BOQ & BOM Extraction | 4D Simulation | Autodesk Quantity Take-off | Project Coordination | Construction Documentation | As-built Drawing/ MEP design | Fire Safety Modeling | Construction Sequencing | Dynamo for Revit | Robot Structural Analysis | Project Estimation | Reporting & Documentation | Labour Billing | Project Tracking | Residential /Commercial BIM Projects | Project Execution | Engineering Drawings Review | Construction Projects | scan to BIM | Sketchup

EDUCATION/CERTIFICATIONS

- BIM Certified | Technostruct Academy | May'24
- B.E - CIVIL | Veltech Hightech Engineering College, Chennai | 2016

BIM Engineer | Iru Consultech Pvt Ltd | Sep 2024 – Till Date

BIM Modeling & Documentation

- Developed 2 and maintained 3 precise, data-rich 3D infrastructure models using **BIM tools** like Revit, AutoCAD, and Navisworks.
- **Generating** high-quality **2D Shop Drawings, As-Built & Submittal Drawings** to support various project phases.
- **Handled 3D BIM models** for infrastructure projects scaling up to **13 floors**.
- Produced and **managed MEP shop** and as-built drawings for **3 projects**, delivered MEP designs for 2, achieving an average 15% time savings over traditional methods through BIM.

Project Execution & Cross-functional Coordination

- Collaborating with project stakeholders to **resolve design clashes**, ensuring constructability, and reducing rework.
- Maintaining drawing transmittal and coordinating with site team.
- Achieved **80% improvement in project coordination** by reducing RFIs and minimizing rework through proactive clash detection and resolution.
- Working closely with multidisciplinary teams throughout the **pre- and post-construction phases** to build, update, and finalize project models.
- Serving as a **BIM liaison** between design, engineering, and construction teams, promoting seamless information integration across the project lifecycle.

PROJECT EXPERIENCE

1. Rainpalm | 13-Storey Residential Building | Maldives (ARCH & STR & MEP 3d model).
 2. Rainpearls | 13-Storey Residential Building | Maldives (ARCH & STR 3d model).
 3. Laurels V.Thinadhoov Resort project | Maldives (ARCH & STR 3d model).
 4. Godown Project-10280-MEP design and quantity take-off
 5. Downtown Davie – Internship project
- Worked across **Architecture, Structural, & MEPF disciplines** for the **Downtown Davie project**.
 - Developed **BIM-integrated models** for interdisciplinary coordination, clash detection, and validation using **Navisworks**.
 - Reviewed **contract documents, MEP drawings, and specifications** for engineering execution.
 - Created **Revit parametric families, 4D simulations**, and extracted **BOQ/BOM** using Autodesk tools.
 - Generated **clash and coordination reports**, shop drawings, and installation drawings for approval and execution.
 - Managed **project tracking and collaboration via BIM 360**.

Jr. Estimation Engineer | Southern Investments Pvt. Ltd. | Mar 2017 – Dec 2017

Project Estimation & Reporting

- Prepared detailed **cost estimates** for multiple projects.
- Maintained monthly reports including WIP, BTFC, and BIMMR.

Site Coordination & Documentation

- Compiled daily site progress reports for Senior Engineer review.
- **Verified measurement books** and recorded site data accurately.

Billing & Data Management

- Prepared weekly labour bills and **monitored workforce data**.
