

HARISH C

Civil Engineer

+91 8760925486

vijayaharish440@gmail.com

India | Willing to relocate to Gulf countries

SUMMARY

Civil Engineering graduate with strong technical skills in AutoCAD, Sketchup, and interior design. Experienced through academic projects and an internship at NLC India, specializing in earthquake-resistant structures. Eager to contribute innovative solutions and grow in a dynamic engineering environment.

EDUCATION

Dhanalakshmi Srinivasan Engineering College - 2025

B.E Civil Engineering CGPA: 8.4

Dhanalakshmi Srinivasan Polytechnic College- 2022

Diploma in Civil Engineering : 89%

SKILLS

- AutoCAD 2D Model & 3D Model
- SketchUp in 3D Model
- V Ray & Enscape in Rendering
- Total Station Surveying
- Site Inspection & Supervision
- Communication and Time Management

SEMINAR & CONFERENCE

National Seminar Attended: "Emerging Contaminants: Unveiling Environmental Threats to Human Health, Ecosystem, and Water Quality" Participated in a 2-day National Level Seminar sponsored by SERB and organized by K. Ramakrishnan College of Technology, Trichy (April 26-27, 2025).

Paper Presented: "Utilization of Industrial and Construction Waste Materials in Concrete: A Study on Microsilica and OBPP"

Presented at the International Conference on Technological Innovations for a Sustainable Future (ICTISF-2025), held at Dhanalakshmi Srinivasan Engineering College, Perambalur (April 2025).

PROFESSIONAL EXPERIENCE

Interior Design Internship

- Worked on interior layout planning, basic 3D visualization, and client presentation drawings.
- Prepared 2D floor plans and 3D models using AutoCAD and SketchUp.
- Conducted site visits to coordinate with contractors and ensure design implementation

NLC Mining (SMD Department)

- Industrial Internship Gained insight into large-scale mining operations, safety protocols, and site execution practices.
- Gained practical exposure to structural maintenance operations in mining infrastructure.
- Observed inspection and repair procedures for structural components and heavy equipment foundations.

WORKSHOPS & CERTIFICATION

- **Building Information Modeling (BIM)** – Participated in a technical workshop conducted by SASTRA Deemed University, School of Engineering (October 6, 2023). Gained foundational understanding of BIM processes, 3D modeling, and its role in integrated project delivery.
- **Digital Land Surveying and Mapping** – Attended a National Level Workshop organized by Kongunadu College of Engineering & Technology (September 23, 2023). Learned modern surveying techniques including use of Total Station, GPS, and GIS technologies.

ACADEMIC PROJECTS & RESEARCH

Research Paper: "Utilization of Industrial and Construction Waste Materials in Concrete: A Study on Microsilica and OBPP". Presented at: International Conference on Technological Innovations for a Sustainable Future (ICTISF-2025), DSEC, Perambalur. Conducted experimental research on sustainable concrete by partially replacing cement with Microsilica and Overburnt Brick Powder (OBPP).

Design Project: **Design of Earthquake Resistant Hexagonal Elevated Water Tank**. Developed a detailed structural model of an elevated hexagonal water tank with enhanced seismic resistance. Performed analysis considering base shear, overturning moments, and hydrodynamic pressure in compliance with IS 1893 and IS 3370 codes.
