

MUHAMMED MIDLAJ T P

ELECTRICAL BIM MODELER

Malappuram, Kerala, India | +91 7025239926 | muhammedmidlajtp1@gmail.com
<https://www.linkedin.com/in/bimmodelarmidlaj/>

PROFESSIONAL SUMMARY

A detail-oriented **Electrical BIM Modeler** with over 1 years of specialized experience in developing and coordinating 3D electrical models for large-scale GCC projects. Expertise in **Autodesk Revit MEP, Navisworks Manage, and AutoCAD** for creating clash-free, data-rich models compliant with DEWA standards and LOD 300-400 specifications. A proactive team player dedicated to leveraging VDC principles to enhance project efficiency, accuracy, and multidisciplinary collaboration from design to as-built stages.

CORE COMPETENCE

- Electrical BIM Modeling (LOD 300-400)
- MEP Coordination & Clash Resolution
- DEWA & UAE Building Standards Compliance
- Shop Drawing & As-Built Documentation
- Autodesk Revit MEP & AutoCAD Proficiency
- Navisworks Manage for Clash Detection
- Virtual Design & Construction (VDC) Principles
- BIM Execution Plan (BEP) Adherence
- Parametric Revit Family Creation
- Single-Line Diagram (SLD) & Riser Diagrams
- Electrical Load Scheduling & Calculations
- RFI (Request for Information) Management

WORK EXPERIENCE

BIM Modeler

GulfTech MEP Solution LLP

India

July 2024 - Present

- Developed and managed comprehensive 3D electrical models using Revit MEP for over 4 major residential and mixed-use projects based in Dubai.
- Performed weekly clash detection and analysis using Navisworks Manage, successfully identifying and resolving an average of 80+ clashes per project before the construction phase.
- Generated precise and detailed shop drawings, coordinated layouts, and as-built drawings, reducing on-site revisions by 15%.
- Achieved 99% accuracy in model data by strictly adhering to project-specific BIM Execution Plans (BEP) and LOD 300/350/400 standards.
- Collaborated effectively with a multidisciplinary team of 10+ engineers, architects, and project coordinators to ensure seamless MEP integration.
- Created custom parametric Revit families for electrical fixtures, panels, and containment systems, enhancing model detail and consistency.
- Prepared and maintained detailed electrical load schedules and Single-Line Diagrams (SLDs) in compliance with DEWA regulations.

KEY PROJECTS

G+12 Residential Towers – UAE

Scope: High-rise residential development

- Developed full 3D electrical BIM model (lighting, power, ELV, containment) using Autodesk Revit.
- Coordinated with mechanical and plumbing disciplines to produce clash-free models.
- Delivered shop drawings and electrical load schedules per DEWA requirements.
- Used Navisworks for clash detection

G+M+2 Building – Masfout, UAE

Scope: Mixed-use low-rise building

- Modeled all electrical systems including SLDs, lighting, and emergency systems.
- Ensured model accuracy for permit approval and consultant coordination.
- Created as-built drawings and implemented design changes post-review

Villa G+1 – Wadi Alamardi, UAE

Scope: Luxury residential villa

- Designed complete electrical layout in Revit including ELV, lighting, and power.

- Adhered to LOD 350 standards for detailed construction drawings.
- Collaborated with architectural team to coordinate fixture placements and panel locations.

Villa G+1 – Al Aweer, UAE

Scope: Private residence

- Executed clash-free coordination between electrical and HVAC ducting systems.
- Generated Revit families for custom lighting and switchgear components.
- Assisted project engineers during online coordination meetings.

EDUCATION

Diploma in Electrical & Electronics Engineering | CGPA: 7.66

Orphanage polytechnic college edavanna

CERTIFICATIONS

- Autodesk Certified Professional (ACP) in Revit for Electrical Design
- BIM Fundamentals for Engineers

TECHNICAL SKILLS

- **BIM Software:** Autodesk Revit MEP, Navisworks Manage, BIM 360
- **CAD Software:** AutoCAD
- **Productivity Suites:** MS Office Suite (Word, Excel, Outlook)
- **BIM Knowledge:** Clash Detection, Parametric Family Creation, VDC Principles
- **Electrical Design:** SLD Creation, Load Scheduling, Power & Lighting Layouts
- **Standards:** DEWA, UAE Codes, LOD 300-400, ISO 19650

LANGUAGES

- English (Professional Proficiency)
 - Malayalam (Native)
 - Tamil (Conversational)
 - Hindi (Conversational)
