PROFILE

Dedicated BIM Technician with professional experience at RIDH Engineering Services, specializing in Building Information Modeling (BIM) for architectural and modular construction projects. Experienced in developing high-quality 3D models, construction documentation, and shop drawings using Autodesk Revit and Navisworks. Skilled in multidisciplinary coordination, clash detection, and BIM workflows, with hands-on experience delivering LOD 300–500 models and fabrication-ready outputs. Adept at supporting prefabrication processes, enhancing design coordination, and minimizing on-site rework through effective BIM implementation. Committed to accuracy, efficiency, and delivering project requirements within deadlines while maintaining industry standards and best practices.

EDUCATION

2016 - 2017

VELAMMAL MATRIC HR SEC SCHOOL

- HSC
- 70.5

2017 - 2021

KAMARAJ COLLEGE OF ENGG & TECH

- Bachelor of Civil Engineering
- CGPA: 7.2

WORK EXPERIENCE

■ DEC 2025 - PRESENT

RIDH ENGINEERING SERVICE

BIM TECHNICIAN

**SED (SPORT ENTERTAINMENT DISTRICT) -
RED SEA GLOBAL, SAUDI ARABIA**

- Developed and managed architectural BIM models using Autodesk Revit in accordance with project standards and requirements.
- Created and modified door, window, and joinery families to support project-specific design needs.
- Performed model coordination and clash detection using Navisworks, identifying and resolving interdisciplinary clashes.
- Prepared and managed project sheets, including views, annotations, schedules, and documentation for project deliverables.
- Completed Step-2 asset development and coordination for assigned assets, ensuring accuracy and compliance with BIM requirements.

TECHNICAL SKILLS

- Auto Desk Revit
(Architecture, Structure, MEP)
- Navisworks Manage (Clash
Detection, 4D Simulation)
- AutoCAD, Civil 3D
- MS Office Suite (Excel, Word,
PowerPoint)

BIM SKILLS

- Architectural BIM Modeling
- Family Creation (Parametric
Families)
- Clash Detection & Coordination
- Sheet Creation & Documentation
- Schedules & Quantity Extraction
- BIM Standards & LOD 300–400
- Model Quality Checks
- Drawing Extraction

WORK EXPERIENCE SED (SPORT ENTERTAINMENT DISTRICT) - RED SEA GLOBAL, SAUDI ARABIA - Modified architectural models to accommodate MEP openings and coordination requirements. - Ensured model quality, alignment, and adherence to BIM standards throughout the project lifecycle. - Collaborated with multidisciplinary teams to improve design coordination and reduce construction rework. HCI (HOTEL CLUSTER ZONE -1) RED SEA GLOBAL, SAUDI ARABIA - Developed project-based parametric families and BIM models up to LOD 400 using Autodesk Revit. - Created analytical families with custom parameters to support project requirements. - Prepared and managed sheet setup, documentation, and project deliverables. - Performed Step 2 asset development and coordination for assigned project assets. - Conducted Revit warning clearance and model health checks to maintain model quality and performance. - Ensured compliance with BIM standards, project specifications, and quality requirements. - Coordinated with multidisciplinary teams to support efficient project delivery.	SOFT SKILLS - Communication - Teamwork - Problem Solving - Time Management - Adaptability - Leadership - Attention to Detail - Coordination - Willingness to Learn LANGUAGE - English - Tamil CERTIFICATE - Master Certificate In BIM
